Professional Experience

Software Engineer *Jun 2025 - Present*

Epik Solutions

- Built React SPAs with product-focused UX and clean component architecture, integrating Node.js REST APIs via well-structured contracts and reducing front-end bug reports by 32% across enterprise search
- Developed ASP.NET Core backend services with secure development practices including input validation, auth middleware, and rate limiting, reducing API-level security vulnerabilities by 30% across prod.
- Optimized PostgreSQL relational database queries serving 10M+ user interaction records, applying index tuning and query plan analysis to cut average response time by 40% under concurrent production load.
- Containerized React and .NET microservices with Docker and orchestrated Kubernetes deployments on AWS, implementing CI/CD pipelines that reduced release cycle time from two weeks to three days.
- Debugged complex web application bottlenecks using profiling tools across React front-end and Golang service layers, applying SDLC code review practices and reducing mean incident resolution time by 25%.

Full Stack Engineer *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected clean RESTful and GraphQL APIs in Node.js for a multi-tenant platform serving 15+ enterprise clients, integrating third-party compliance data sources and maintaining 99.9% uptime.
- Designed and optimized PostgreSQL relational schemas with indexed queries and execution plan analysis, improving structured data retrieval by 45% and supporting 10,000+ concurrent users.
- Integrated DynamoDB non-relational stores for high-throughput session and event data alongside PostgreSQL for structured records, delivering a hybrid data architecture that scaled across all tenants.
- Provisioned AWS infrastructure using Terraform IaC and configured CI/CD pipelines across 10+ microservices, reducing manual deployment errors by 40% and enforcing consistent processes.
- Built full-stack React dashboards visualizing identity and compliance graphs, collaborating with stakeholders to define UX flows and API contracts that reduced user task completion time by 30%.

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built Python data ingestion services with AWS Lambda and Terraform IaC, version-controlling via GitHub and reducing environment provisioning time by 40% across 3 production systems.
- Implemented secure serverless data synchronization services applying SDLC checkpoints, improving data consistency for 500+ employees and eliminating unauthorized cross-system data exposure.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered 10+ full-stack feature modules using React and Spring Boot REST APIs with PostgreSQL, ensuring data integrity and accurate tracking for 500+ scientists on a regulated cloud platform.
- Designed relational database schemas across product modules in PostgreSQL and MSSQL, authoring optimized indexed queries that improved application response times by 35% under concurrent user load.
- Authored 100+ automated test cases and resolved critical production bugs through systematic debugging of complex web application layers, improving overall system reliability and data integrity by 40%.

Skills

Programming Languages: Python, C#, Java, TypeScript, JavaScript, SQL, Bash
Front-End: React, Angular, HTML5, CSS3, ES6+, RxJS, NPM
Back-End & Frameworks: ASP.NET Core, Node.js, Spring Boot, GraphQL, Golang/Gin
Databases: PostgreSQL, MSSQL, DynamoDB, MySQL, MongoDB, Redis, OpenSearch
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, Azure DevOps
Security & Practices: Secure Development (SDLC), Input Validation, Auth Middleware, Application Security

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
