Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Application Operations & Support

- Led development of robust **Oracle PL/SQL** packages for critical business logic, integrating with **ServiceNow** for incident management, improving data integrity and system reliability by 25%.
- Designed and implemented complex **Unix Shell Scripts** for automated data backups and system health checks, leveraging **Control-M** for scheduling, reducing operational overhead by 20% across environments.
- Provided expert **applications production support**, resolving high-priority issues using **AppDynamics** for performance monitoring, reducing incident resolution time by 30% and ensuring business continuity.
- Collaborated with cross-functional teams in an **Agile environment** to refine system requirements, delivering enhancements to the **annuity policy administration** platform, increasing processing efficiency by 18%.
- Performed extensive **performance tuning** of **Oracle** databases and **PL/SQL** code, optimizing query execution plans, resulting in a 40% reduction in reporting generation time for key stakeholders.
- Conducted **Client-interaction** sessions to gather feedback and provide technical solutions, managing expectations effectively and leading to a 95% client satisfaction score for project deliveries.
- Spearheaded **release management** processes, coordinating deployments across environments using **Serena Dimensions** and **JIRA**, ensuring zero rollback incidents over 15 major releases.
- Developed advanced **troubleshooting** guides and knowledge base articles for complex system issues, empowering junior engineers and decreasing average ticket escalation by 15%.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Core Banking System Development & Support

- Developed and maintained complex **Oracle PL/SQL** procedures for financial transaction processing, ensuring compliance with regulatory standards, resulting in zero audit findings over three years.
- Wrote and optimized efficient **Unix Shell Scripts** for nightly batch job automation and data transformation tasks, significantly reducing manual intervention by over 60%.
- Participated in **Agile** sprints, contributing to the design and implementation of new features for the banking platform, enhancing user experience and system reliability by 20%.
- Provided **applications production support** for critical banking systems, diagnosing and resolving issues promptly, maintaining a 99.9% uptime for core services.
- Implemented **change management** protocols for database schema updates and application deployments, ensuring seamless transitions with minimal downtime, achieving 98% successful deployments.
- Utilized **JIRA** for issue tracking and project management, collaborating with developers and QA to resolve defects, reducing bug re-open rates by 25% across 10+ projects.
- Assisted in **Client-interaction** to understand business requirements for system enhancements, translating needs into technical specifications, improving project clarity and reducing rework by 15%.
- Conducted thorough **data processing** and migration using **SQL** and **PL/SQL** scripts, ensuring data integrity during system upgrades, successfully transferring 100GB of historical data.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Enterprise Resource Planning Solutions

- Developed core functionalities for an **ERP** module using **Oracle PL/SQL**, handling inventory management and order processing, improving data consistency across 5 departments.
- Authored and maintained **Unix Shell Scripts** for automated report generation and routine system maintenance tasks, decreasing manual processing time by 35% weekly.
- Performed database queries and scripting using **SQL** to extract, transform, and load data, supporting various business intelligence initiatives, processing over 50,000 records daily.
- Engaged in system monitoring and initial **troubleshooting** of application issues on **Linux** servers, escalating complex problems to senior engineers, maintaining 99% system availability.
- Collaborated with team members in an **Agile** framework to develop features and resolve bugs, contributing to on-time delivery for 8 major sprint cycles.
- Documented technical specifications and user manuals for implemented features, facilitating smoother onboarding for new team members and reducing support queries by 10%.

Skills

Languages: Oracle PL/SQL, Unix Shell Script, SQL
Frameworks & Tools: Linux, Oracle, ServiceNow, JIRA, Serena Dimensions, Control-M, AppDynamics, Magic XPA
Concepts: Agile, production support, Client-interaction, performance tuning, data processing, troubleshooting, release management, change management

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
