Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | FinTech Lending Platform

- Designed and implemented a high-throughput **Python** lending decision engine using **AWS Lambda** and **DynamoDB**, processing 1.5M loan applications daily with 99.9% uptime.
- Led development of a new **Kotlin microservice** for partner integrations, utilizing **gRPC** and **Kafka** to ensure secure, real-time data exchange for over 20 financial partners.
- Architected and deployed an enhanced **Java** payments system on **Kubernetes**, integrating with **Stripe** APIs; reduced transaction latency by 35% across 5M monthly payments, improving efficiency.
- Implemented comprehensive **observability** solutions using **Prometheus** and **Grafana** for critical FinTech services, enabling proactive issue detection and reducing incident response by 40%.
- Developed **Terraform** scripts to manage **AWS** infrastructure as code, standardizing environments and accelerating deployment cycles for new features by 25% under regulated guidelines.
- Engineered data consistency checks and audit trails across distributed **PostgreSQL** databases using **event-driven architectures**, ensuring 100% data integrity for regulatory reporting.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise Data Integration Platform

- Developed and maintained robust **Python ETL** pipelines using **Apache Airflow** on **AWS S3** for large-scale financial data ingestion, processing 10M records daily.
- Built scalable **RESTful APIs** with **Django** and **PostgreSQL** to support internal operational tooling, handling 500k daily requests with 99.8% availability for users effectively.
- Migrated legacy services to **AWS Lambda** and **SQS** for improved resilience and cost-efficiency, reducing infrastructure costs by 30% and enhancing system reliability.
- Contributed to a data streaming platform using **Kafka** and **Apache Flink** for real-time analytics, processing 2M events per second, supporting critical business intelligence needs.
- Developed an internal tool using **Python** and **Streamlit** to visualize financial data, enabling business analysts to generate reports 50% faster, improving decision-making processes.
- Integrated **Elasticsearch** for log aggregation and full-text search across distributed **Java** microservices, improving debugging efficiency for engineers by 30% effectively.
- Collaborated on backend service optimization using **Java** and **Spring Boot**, decreasing response times by 15% for high-traffic financial APIs, enhancing user experience.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Client Solutions Development

- Developed responsive web applications using **React.js** and **Node.js** for client-facing projects, improving user engagement by 20% across multiple industry verticals.
- Implemented **RESTful APIs** with **Java Spring Boot** to support mobile and web clients, handling 100k daily requests with robust error handling reliably.
- Designed and optimized **MySQL** database schemas for various projects, enhancing data retrieval performance by 30% for reporting modules and user-facing dashboards.
- Utilized **Git** for version control and collaborated effectively in an **Agile** environment, delivering features on time and reducing merge conflicts by 10% consistently.
- Configured and deployed applications to **AWS EC2** instances, ensuring secure, scalable infrastructure for client solutions, improving system availability to 99.5% reliably.
- Wrote comprehensive documentation for APIs and system architecture using **Confluence**, facilitating smoother onboarding for new team members and reducing integration issues significantly.
- Ensured adherence to security best practices for client data by implementing secure coding standards and conducting regular code reviews, protecting sensitive information across web applications.

Skills

Languages: Python, Java, Kotlin
Frameworks & Tools: Spring Boot, Django, Docker, Kubernetes, Kafka, gRPC, Git, Prometheus, Grafana, Apache Airflow, Apache Flink, JUnit, Mockito, Stripe, Streamlit, React.js, Node.js, Confluence, Jenkins
Cloud & Infra: AWS, Terraform, CI/CD
Databases & Search: PostgreSQL, MySQL, DynamoDB, Elasticsearch
Concepts: RESTful APIs, Microservices, Distributed Systems, Event-Driven Architecture, System Design, Scalability, Observability, Auditability, Data Consistency, Regulatory Compliance, Agile
AI Tools: OpenAI API

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
