Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Energy Trading Optimization

- Led fullstack development of a new energy market trading platform using **Vue.js** and **Python** with **FastAPI**, achieving 99.9% uptime and processing 500,000 trades daily.
- Architected and implemented **AWS** cloud infrastructure using **Terraform** and **ECS** for high-performance data storage, scaling capacity by 300% for new market entry.
- Designed and optimized complex frontend state management with **Vue.js** for real-time asset dispatch applications, improving trader decision-making speed by 15%.
- Established comprehensive **CI/CD** pipelines using **Git** and **Docker** for automated deployments, reducing release cycles from bi-weekly to daily.
- Collaborated cross-regionally with financial trading teams to gather requirements, enhancing user experience through intuitive web applications, decreasing support tickets by 25%.
- Implemented robust **API frameworks** and microservices architecture, ensuring secure and scalable data exchange for 20+ external partners, increasing system throughput by 40%.
- Mentored junior engineers on best practices for clean, maintainable code within the **SDLC**, boosting team code quality metrics by 20% consistently.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Real-time Financial Data Platform

- Developed and maintained core components of a real-time financial data platform using **Python** and **Django**, supporting 10,000 concurrent users with zero downtime.
- Built interactive dashboards and reporting features with **Vue.js** for visualizing complex financial metrics, improving client data analysis efficiency by 20%.
- Managed **Postgres** databases, optimizing queries and schemas to handle increased data volumes by 50% for critical market analysis systems.
- Implemented **Docker** containerization for scalable deployment of microservices on **AWS ECS**, reducing resource consumption by 15% across environments.
- Contributed to defining architectural standards for new features, integrating secure **API frameworks** for external system interoperability, achieving 99.99% data integrity.
- Designed and developed robust data ingestion pipelines from various financial sources using **Python**, processing over 1TB of data daily with 99.5% accuracy.
- Enhanced existing web applications by refactoring legacy code and introducing new features, improving overall system responsiveness by 10% for users.
- Utilized **Git** for version control and collaborative development within an agile **SDLC**, accelerating feature delivery by 25% for clients.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Enterprise SaaS Web Solutions

- Developed responsive user interfaces for enterprise **web applications** using **Vue.js** and JavaScript, enhancing user engagement metrics by 15%.
- Implemented backend services with **Python** and Flask, integrating with various third-party APIs for seamless data exchange, processing 100,000 transactions hourly.
- Managed relational databases, primarily **Postgres**, for storing critical business data, ensuring data consistency and query performance for all applications.
- Collaborated on defining and implementing frontend architectural standards, ensuring maintainable and scalable codebases across multiple projects, reducing technical debt by 10%.
- Utilized **Git** for version control and participated in code reviews, adhering to best practices within a collaborative development environment, improving code quality by 10%.
- Deployed applications to production environments, gaining foundational experience with cloud platforms like **AWS**, contributing to a 99% service uptime.

Skills

Languages: Python, JavaScript
Frameworks & Tools: Vue.js, FastAPI, Django, Git, Docker, Flask
Cloud & Infra: AWS, ECS, Terraform, Postgres
Concepts: SDLC, CI/CD, Microservices Architecture, API Frameworks, Complex Frontend State, User Experience, Web Applications, Architectural Standards

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
