Lohit Gali

Automation Engineer
lohitgali@gmail.com | +1(475)-291-1455

Summary

- Experienced **Automation Engineer** with 5+ years of hands-on expertise in **scripting, automation workflows, and systems integration** across cloud and hybrid environments.
- Specialized in **PowerShell scripting for infrastructure automation**, data processing, and security controls across **AWS, Azure, and enterprise environments**.
- Proficient in building **workflow automations using Power Automate** and n8n to streamline repetitive business operations and improve process efficiency.
- Skilled in integrating APIs, managing IAM policies, and designing visual monitoring and reporting systems using Power BI, enabling data-driven decision-making.
- Proven track record in supporting compliance and security initiatives through custom automations, real-time dashboards, and cloud-native tools like Lambda, Step Functions, and EventBridge.

Skills

Scripting & Automation: PowerShell, Python, Bash, Power Automate, VBScript, VisualCV
Workflow Orchestration & RPA: Power Automate, n8n, AWS Step Functions, EventBridge
Data Visualization & Reporting: Power BI, Tableau, Grafana
Cloud Platforms & Services: AWS (Lambda, S3, EC2, IAM), Azure (AD, Logic Apps), GCP (Cloud Functions)
CI/CD & DevOps Tools: Jenkins, GitHub Actions, Azure DevOps, Docker, Kubernetes, Terraform
Databases & Data Management: SQL (MySQL, PostgreSQL), NoSQL (MongoDB, DynamoDB)
Testing & Monitoring: Selenium, Postman, Splunk, Nagios, Prometheus
Operating Systems: Windows Server, Linux (Ubuntu, CentOS), macOS
Security & Compliance: IAM (AWS IAM, Azure AD), OAuth 2.0, JWT, SSO Integration

Professional Experience

Epic Solutions *Jun 2025 – Present*
Senior Automation Engineer (Business Applications & Reporting)
Project: CIFC Enterprise Automation & KPI Reporting Modernization

- Built Power Automate flows and Power Apps solutions with Dataverse as the backend, automating routine processes and enhancing end-user efficiency.
- Developed advanced n8n workflows for API-based integrations, orchestrating data pipelines to aggregate and normalize metrics from multiple systems into Dataverse and Azure storage.
- Delivered KPI dashboards and metrics tracking using Power BI, aligning business intelligence with compliance/security needs and enabling leadership to monitor trends across Defender, Darktrace and other security suites.
- Designed and implemented Microsoft Fabric data pipelines using Dataflows Gen2, Lakehouse, and Semantic Models, enabling centralized, long-term retention and analytics of security and compliance data beyond native source limits.
- Designed and automated SSRS reports integrated with Dynamics 365 (D365) to streamline operational reporting, ensuring accuracy and faster delivery of financial and business insights.

Samay Systems LLC *Feb 2025 – Jun 2025*
Senior Automation Engineer (Cloud & Compliance Automation)
Project: Compliance Platform (SaaS) – Security & Compliance Automation

- Developed PowerShell modules to automate evidence collection from AWS CloudTrail, Azure Logs, and GitHub Audit Logs.
- Built Power Automate and n8n workflows for multi-system compliance checks via REST APIs (Jira, GitHub, Azure AD).
- Designed Power BI reports using DAX and DirectQuery for real-time SOC 2 and HIPAA control tracking.
- Implemented AWS Lambda (Python), EventBridge, and Step Functions to schedule tasks and send alerts.
- Automated IAM provisioning via Microsoft Graph API with Slack webhook notifications.
- Partnered with compliance teams to reduce audit prep time by 40%.

Arvam Tech *Jul 2023 – Jan 2025*
Automation Engineer
Project: Enterprise Asset Management System

- Built PowerShell scripts to automate CMDB updates and validate asset configs using JSON schema.
- Developed n8n workflows to sync asset inventory and process webhook-driven events.
- Integrated Power BI dashboards with gateway refresh for asset tracking and usage metrics.
- Used Power Automate to route asset approvals and escalate issues via Teams and SharePoint.
- Configured Jenkins jobs with Groovy and shell scripts to enforce tagging compliance.

RHYM Tech *Aug 2022 – May 2023*
Automation Engineer
Project: Cybersecurity Threat Intelligence Platform

- Created PowerShell scripts for threat detection using Windows Event Logs and Linux syslogs.
- Built Python pipelines to ingest Splunk and Kafka data into MongoDB.
- Developed Power BI dashboards using custom connectors for threat trend visualization.
- Integrated n8n to auto-create Jira tickets, tag CVEs, and alert via Slack.
- Managed conditional access and credential rotation using Azure AD Graph API.

ZeMoSo Technologies *Jul 2021 – Aug 2022*
Automation Developer
Project: Biotech LabOps Automation

- Automated lab workflows using PowerShell, REST APIs, and CSV processors.
- Integrated OAuth2-secured APIs for RBAC control in lab pipelines.
- Built Power Automate flows for experiment approvals and lab availability checks.
- Designed Power BI dashboards with Power Query to visualize experiment KPIs.
- Created reusable n8n workflows for task orchestration and CRM syncing.

Projects

Compliance Automation Platform – Samay Systems
Tech Stack: PowerShell, Python, AWS, Power BI, n8n, PostgreSQL
Designed serverless, fully automated compliance platform. Used PowerShell for scheduled data scraping and orchestration.
Enterprise Asset Management Automation – Arvam Tech
Problem: Manual asset tracking was inefficient.
Solution: Automated data flows with PowerShell + Express.js, integrated Power BI, and used Power Automate for approval chains.
Real-Time Threat Dashboard – RHYM Tech
Problem: Poor visibility into threats and incidents.
Solution: Built Kafka/Splunk ingestion pipelines with Power BI dashboards and automated incident responses.

Education

Master's in Computer Science, Oklahoma State University, Stillwater, OK *May 2024*
Bachelor's in Computer Science, JNTU Hyderabad, India *Jun 2021*
