Professional Experience

Full Stack Engineer (Enterprise Security) *Jun 2025 - Present*

Epik Solutions

- Analyzed and optimized frontend performance using Chrome DevTools and Vite, reducing initial bundle size by 30% and improving Core Web Vitals (LCP/FID) for real-time security dashboards
- Developed a secure front-end application using Vue and TypeScript for Azure hosted security platforms, optimized microservices and UI/UX, reducing incident response time by 15 minutes for security teams.
- Engineered real-time analytics dashboards with Vue, Pinia, and Tailwind CSS, eliminating 20+ hours/week manual reporting, improved decision latency for C-suite stakeholders.
- Integrated Azure AI Studio and RAG via RESTful APIs and Websockets into front-end tooling, processed 1,000+ security events daily, reducing analyst workload by 30%.
- Implemented robust DevOps practices and CI/CD pipelines for Azure hosted applications, accelerating deployment cycles by 40%. Ensured consistent, high-quality releases for 500+ users.

Founding Engineer (Full Stack AI) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected front-end of a multi-tenant B2B Compliance SaaS platform using Vue and TypeScript, delivered intuitive UI/UX for 15+ enterprise clients, scaling to 10,000+ users.
- Delivered production-ready UI/UX for 15+ enterprise clients, implemented application usage metrics and A/B test experiments to track feature adoption, resulting in a 20% increase in user engagement
- Designed and integrated RESTful APIs for cloud-hosted applications, ensuring data isolation and high availability, supported 10,000+ users with secure, efficient back-end communication.
- Developed AI tooling (RAG, Agentic Systems) integrated with Azure AI Studio, reduced manual auditor effort by 70% through automated evidence collection and summarization.
- Implemented DevOps practices for CI/CD pipelines, automating deployment of data ingestion systems., ensured reliable data flow from enterprise systems, enhancing data integrity.

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Developed front-end components with WCAG 2.1 accessibility standards and ARIA patterns for an Azure hosted identity lifecycle system using Vue and TypeScript, reduced employee provisioning time by 80%.
- Implemented RESTful APIs and UI/UX improvements for MLOps data labeling infrastructure, enhanced annotation throughput by 20%, benefiting ML training pipelines effectively.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered front-end features for a robotic lab automation platform, utilized by 500+ scientists, applied modern front-end design principles to enhance user experience.
- Implemented robust state management solutions across 10+ product modules, ensuring accurate tracking of complex experimental data. Demonstrated strong problem-solving skills.
- Authored 100+ test cases and resolved critical production issues, adhering to agile development methodologies, ensured data integrity and system reliability for regulated platform.

Skills

Languages: Python, C#, Java, Golang, Ruby, TypeScript, JavaScript, SQL, Bash, C++
Frameworks: Vue, Pinia, WXT, VITE, Tailwind CSS, React, Node.js, GraphQL, Spring Boot, Ruby on Rails, Gin, TensorFlow, LangChain
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, DevOps practices, CI/CD pipelines
Databases: PostgreSQL, MySQL, MongoDB, Redis, OpenSearch, Pinecone, Neo4j
Tools & Methodologies: Git, n8n, Power Platform, WSL2, Linux, TDD, Agile, SRE, design principles, WCAG/ARIA, Profiling, A/B Testing, Application Metrics, RESTful APIs, Websockets, Agile, UI/UX Design

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
