Neel Gali

Distributed Systems Engineer (C/C++)

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX | linkedin.com/in/neelgali

Professional Experience

Distributed Systems Engineer (C/C++) *Jun 2025 - Present*

Epik Solutions

- Architected C++ distributed software systems, coordinating computation across security platforms. Automated 40% SOC workflows, reducing MTTR by 15 minutes for internal teams.
- Developed distributed APIs for real-time analytics, aggregating telemetry from 15+ systems. Eliminated 20+ hours/week manual reporting, improving decision performance for C-suite.
- Developed large-scale distributed AI infrastructure pipelines, processing 1,000+ daily events. Enhanced reliability, reducing analyst workload by 30% through parallel computation.
- Automated enterprise workflows via systems programming, coordinating resources for 500+ users. Achieved 40% reduction in cycle times, demonstrating high performance and scalability.
- Enhanced Live Site reliability by debugging distributed Golang runbooks in multi-node environments. Resolved failures, improving end-to-end pipeline success rates by 25% for fault tolerance.

Senior Systems Engineer (Distributed Computing) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected multi-tenant AI SaaS platform for 15+ clients, scaling to 10,000+ users on AWS. Ensured scalability and fault tolerance in multi-node distributed computing.
- Designed distributed backend systems using Golang and AWS, employing inter-node sockets for strict tenant isolation. Ensured communication reliability across storage layers.
- Optimized LLM-powered compliance automation using large-scale distributed AI infrastructure. Orchestrated data-parallel evidence collection, reducing manual auditor effort by 70%.
- Developed distributed data ingestion pipelines using IPC and cluster resource coordination. Ingested identity data from enterprise systems, achieving high performance for graph models.
- Developed full-stack applications with distributed APIs for compliance and identity visualization. Implemented testing and monitoring tools for enterprise user management.

Systems Engineer Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built automated identity lifecycle system syncing 500+ employees using serverless architecture. Improved provisioning time by 80% through optimized systems programming and scalability.
- Developed distributed APIs for MLOps data labeling infrastructure. Improved annotation throughput by 20% for ML training pipelines, enhancing computation performance.

Software Engineer (Systems) *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for robotic lab automation platform, utilizing systems programming and distributed systems principles. Supported 500+ scientists across microservices architecture.
- Implemented C++ features across 10+ core product modules, ensuring reliable tracking of complex experimental data. Applied strong systems programming foundations.
- Authored 100+ test cases and debugged critical production issues. Ensured data integrity and system reliability in a regulated platform, applying operating systems knowledge.

Skills

Languages: C, C++, Python, Golang, Ruby, TypeScript, JavaScript, SQL, Bash
Frameworks: React, ASP .NET Core, Node.js, GraphQL, Spring Boot, Ruby on Rails, Gin, MPI
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD
Databases: PostgreSQL, MySQL, MongoDB, Redis, OpenSearch, Neo4j
Tools & Methodologies: Git, Linux, Agile, SRE, IPC, socket programming, scalability, fault tolerance, multi-node environments, distributed APIs, inter-node sockets, reliability, TDD, Datadog Continuous Profiler, large-scale distributed AI infrastructure

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
