Neel Gali

AI Systems Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Platform

- Designed and implemented complex **multi AI agent architectures** with **memory**, **tool use**, and **feedback loops** using **LangChain** and **CrewAI**, boosting user engagement by 35%.
- Developed scalable **RAG systems** integrating **OpenAI**, **Anthropic**, and **Gemini LLMs** via **Node.js API orchestration**, enhancing real-time content relevance by 40%.
- Led development of **Next.js** frontend components, optimizing **API architecture** for performance and ensuring seamless user experience across devices, boosting conversion rates by 22%.
- Implemented robust **error handling** and monitoring for critical **AI agents** deployed on **AWS** and **GCP Kubernetes**, reducing system downtime by 90%.
- Orchestrated **TikTok** video classification and tagging systems using **Python** and **embeddings**, processing 500,000 videos daily, improving content moderation accuracy by 25%.
- Managed **CI/CD pipelines** using **Docker** and **Kubernetes** for AI services, integrating rigorous **testing** and **code reviews**, accelerating release cycles by 50%.
- Performed **database optimization** for **PostgreSQL** and **Elasticsearch** clusters, enhancing query performance for **AI model** training data access, resulting in a 3x speed increase.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | B2B Platform

- Developed and maintained **Node.js REST APIs** for data ingestion and processing, serving 10,000 concurrent users and ensuring high availability 99.9% of the time.
- Built scalable **Next.js** micro-frontends with integrated **API orchestration**, improving user interface responsiveness by 20% and enhancing overall platform navigability effectively.
- Implemented data transformation workflows using **Python** on **AWS Lambda**, processing 1 terabyte of data daily for analytical reporting, reducing manual data preparation by 60%.
- Designed and optimized **SQL** database schemas (**PostgreSQL**) for performance tuning and data integrity, reducing query execution times by an average of 40% across key modules.
- Integrated **OpenAI API** for text summarization and semantic search capabilities into existing platform features (after Nov 2022), improving content discovery for users by 25%.
- Deployed and managed containerized applications using **Docker** on **AWS EC2**, enhancing deployment consistency and reducing environment setup time by 75%.
- Contributed to **CI/CD pipeline** automation using **GitHub Actions**, streamlining code delivery and reducing deployment errors by 50% across development and production environments.
- Generated and managed document **embeddings** using **Python** and third-party libraries for similarity search (after Nov 2022), improving search result relevance by 30% for critical data.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | SaaS Platform

- Developed robust backend **Node.js** services with **RESTful APIs** for core enterprise applications, handling over 5,000 requests per second with minimal latency.
- Engineered interactive user interfaces using **React.js** and **JavaScript**, enhancing user experience and decreasing support tickets by 15% annually through robust design.
- Designed and implemented complex **SQL** database solutions (**MySQL**) for client data storage, ensuring data consistency and improving data retrieval speeds by 30%.
- Contributed to cloud infrastructure management on **AWS S3** and **EC2** for application hosting, achieving 99.95% uptime and optimizing resource utilization by 20%.
- Implemented secure authentication and authorization mechanisms (**JWT**, **RBAC**) across microservices, strengthening system security by 40% and ensuring data privacy compliance.
- Participated in **system design** discussions and code reviews, maintaining high **code quality** standards and reducing critical bugs in production by 10% each quarter.

Skills

Languages: Python, Node.js, JavaScript, SQL

Frameworks & Tools: OpenAI API, Anthropic, LangChain, CrewAI, Next.js, LangChain, CrewAI, Docker, Kubernetes, REST, React.js, GitHub Actions, Gemini

Cloud & Infra: AWS, PostgreSQL, Elasticsearch, MySQL, GCP

Concepts: Multi-agent architectures, RAG Systems, Embeddings, API Orchestration, Performance Tuning, Database Optimization, CI/CD, System Design, RESTful APIs, Error Handling, Code Quality, Microservices, JWT, RBAC, TikTok

Education

Master's in Computer Science, Oklahoma State University, Stillwater

Bachelor's in Computer Science, JNTU Hyderabad, India
