Lohit Gali

Senior QA Automation Engineer
lohitgali@gmail.com | +1(475)-291-1455

Summary

- Senior QA Automation Engineer with 6+ years of experience designing and executing end-to-end quality assurance strategies across enterprise applications.
- Proven ability to independently own **test planning, automation frameworks, system integration testing, and UAT for complex systems**.
- Strong background in **Selenium automation** using **Java, test management tools (Xray, Zephyr, TestRail)**, and defect tracking using **Jira** and **Azure DevOps**, ensuring reliable releases through disciplined testing and documentation.

Skills

Automation Testing: Selenium WebDriver, TestNG, JUnit, Java, Cypress
Manual Testing: System Testing, System Integration Testing (SIT), UAT
Scripting & Automation: PowerShell, Python, Bash, Power Automate, VBScript, VisualCV
Test Design & Documentation: Test Plans, Test Scenarios, Test Cases, Traceability Matrices
Test Management: Xray, Zephyr, TestRail
Defect Management: Jira, Azure DevOps, HP ALM / Octane
CI/CD & Execution: Maven, Git, Jenkins
APIs & Tools: Postman, REST APIs
Databases & Data Management: SQL (MySQL, PostgreSQL), NoSQL (MongoDB, DynamoDB)
Methodologies: Agile, Scrum, SDLC
Operating Systems: Windows Server, Linux (Ubuntu, CentOS), macOS

Professional Experience

Epik Solutions *Jun 2025 – Present*
Senior QA Automation Engineer

- Designed automation frameworks using Selenium with Java to reduce repetitive regression cycles and enable faster validation of business-critical workflows.
- Authored detailed test plans, test cases, and execution reports to ensure traceability from requirements through UAT sign-off.
- Executed System Integration Testing (SIT) across multiple dependent systems to validate data flows and service interactions.
- Logged, tracked, and resolved defects using Jira, collaborating with developers to reproduce issues and verify fixes.
- Maintained test execution status and defect metrics in Xray, enabling stakeholders to make informed go/no-go decisions.
- Built Power Automate flows and Power Apps solutions with Dataverse as the backend, automating routine processes and enhancing end-user efficiency.
- Designed and automated SSRS reports integrated with Dynamics 365 (D365) to streamline operational reporting, ensuring accuracy and faster delivery of financial and business insights.

Samay Systems LLC *Jul 2024 – Jun 2025*
QA Automation Engineer

- Developed automated test scripts using Selenium and Java to validate complex user journeys across web applications.
- Created and maintained manual test cases for edge scenarios not suitable for automation, ensuring full functional coverage.
- Performed UAT coordination with business users, validating that system behavior aligned with real operational needs.
- Documented test execution results and defect trends, supporting release readiness reviews.
- Used Azure DevOps to manage defects, test cycles, and sprint-level QA activities.

Arvam Tech *Jul 2023 – May 2024*
QA Engineer

- Executed system testing and regression testing for enterprise applications with frequent release cycles.
- Built and enhanced Selenium automation suites to validate UI behavior and data integrity across releases.
- Designed test cases and test data aligned with functional and non-functional requirements.
- Used Zephyr to manage test cycles and track execution progress.
- Worked closely with developers during defect triage to ensure accurate root-cause identification and verification.

RHYM Tech *Aug 2022 – May 2023*
QA Analyst

- Led manual testing efforts for system integration and end-to-end workflows across multiple services.
- Defined test strategies and execution plans to validate feature readiness prior to UAT.
- Supported automation efforts by identifying high-value test scenarios suitable for scripting.
- Managed defects using Jira, ensuring clear reproduction steps and validation criteria.

ZeMoSo Technologies *Jul 2019 – Aug 2022*
Associate QA Engineer

- Conducted functional, regression, and integration testing across enterprise platforms.
- Wrote structured test cases and test scenarios aligned with evolving requirements.
- Assisted in building Selenium-based automation scripts using Java for repetitive validation tasks.
- Collaborated with cross-functional teams to ensure quality gates were met throughout the SDLC.

Education

Master's in Computer Science, Oklahoma State University, Stillwater, OK
Bachelor's in Computer Science, JNTU Hyderabad, India
