Neel Gali

Software Engineer | Ruby on Rails & Backend Systems
Sunnyvale, CA | neelgali7@gmail.com | +1 (475) 291-1455

Summary

Software engineer with **5+ years of experience** building enterprise security, compliance SaaS, and LabOps applications. Strong in **Ruby on Rails**, REST APIs, SQL optimization, automated testing, and production support.

Technical Skills

Languages: Ruby, SQL, Java, Python, JavaScript, TypeScript
Backend: Ruby on Rails, ActiveRecord, MVC, Object-Oriented Design, REST APIs, Sidekiq, Pundit, Spring Boot
Databases: PostgreSQL, MySQL, Redis, Schema Migrations, Indexing, Query Optimization, Caching
Testing & Delivery: RSpec, FactoryBot, Minitest, RuboCop, Git, GitHub Actions, Jenkins, CI/CD, Code Review
Cloud & Web: AWS, Docker, Microservices, CloudWatch, Prometheus, Grafana, React, HTML/CSS

Professional Experience

Software Engineer *2025 – Present*
Epik Solutions | Enterprise Security

- Developed **Ruby on Rails REST APIs** for enterprise workflows, implementing request validation and structured JSON responses for frontend clients and service integrations.
- Secured Rails endpoints with **JWT authentication and role-based access controls**, restricting access to enterprise resources based on authenticated user permissions.
- Improved backend response times by resolving **ActiveRecord N+1 queries**, adding eager loading, and tuning PostgreSQL composite indexes for frequently accessed records.
- Built **Sidekiq background jobs** for reporting, notifications, and third-party webhook delivery, moving long-running work off request paths with retry handling for failed tasks.
- Integrated Rails services with **Python/FastAPI** document-processing APIs, validating payload contracts and handling downstream failures across service boundaries.
- Added API rate limiting and investigated production bottlenecks using **Prometheus/Grafana** request, error, and latency metrics to guide performance fixes.

Software Engineer *2023 – 2025*
Samay Systems LLC | B2B Compliance SaaS

- Owned **Ruby on Rails backend features** for compliance workflows, delivering three product releases across API development, business logic, data persistence, and production support.
- Introduced **Redis caching** for frequently accessed compliance data, reducing database read pressure and lowering average API response latency by **45%**.
- Expanded **RSpec model, controller, and service tests**, increasing coverage from **38% to 84%** and enforcing automated checks before merges through CI pipelines.
- Implemented **PostgreSQL tenant isolation** and Rails schema migrations, separating customer records and supporting enterprise compliance requirements.
- Replaced scattered authorization checks with **Pundit policy objects**, centralizing per-tenant resource scoping and access rules across Rails controllers.
- Deployed containerized Rails services to **AWS** with Docker and CI/CD, using health checks and rolling releases to support reliable production updates.

Software Engineer *2020 – 2022*
ZeMoSo Technologies | LabOps Platform

- Built **Ruby on Rails APIs** and React features for laboratory workflows, implementing ActiveRecord models and CRUD operations for samples, inventory, and experiment records.
- Developed **versioned REST endpoints** with consistent JSON responses, request validation, and error handling to support predictable integration with frontend clients.
- Implemented **Pundit policy scopes** and role-based permissions to control access to laboratory records and actions across user groups.
- Optimized **PostgreSQL queries and ActiveRecord scopes** for sample tracking and reporting, reducing report generation time by **30%** through targeted index tuning.
- Wrote **RSpec, FactoryBot, and Minitest** coverage for backend behavior, pairing regression fixes with automated tests and reviewing changes with cross-functional engineering and QA teams.
- Automated **GitHub Actions CI/CD** for Rails services, running RSpec tests and RuboCop checks on pull requests and deploying validated builds to staging.

Education

Master's in Computer Science, Oklahoma State University 2024
Bachelor's in Computer Science, JNTU Hyderabad 2021
