Professional Experience

Software Engineer (Full Stack) *Jun 2025 - Present*

Epik Solutions

- Designed scalable backend services and APIs (Golang), integrating security platforms. Automated 40% SOC workflows, cutting MTTR by 15 minutes, enhancing reliability.
- Developed real-time web client applications (React) for analytics, aggregating 15+ systems telemetry, eliminated 20+ hours/week manual reporting, improving stakeholder decision performance.
- Engineered Python-based incident triage pipelines, processing 1,000+ daily security events, reduced analyst workload by 30% through automated event handling, improving system reliability.
- Automated enterprise workflows using scripting (PowerShell), serving 500+ users, reduced operational cycle times by 40%, enhancing collaboration and efficiency across teams.
- Debugged and resolved silent execution failures in distributed Golang runbooks across production environments, enhanced Live Site reliability, improving end-to-end pipeline success rates by 25%.

Software Engineer (Founding) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected and built a multi-tenant SaaS platform (AWS), scaling to 10,000+ users, ensured scalability, tenant isolation, and high availability for production-grade software.
- Designed distributed backend services (Golang, AWS, PostgreSQL) with strict tenant isolation, implemented service-based architectures, ensuring data security and reliability for client applications.
- Developed compliance automation workflows using AWS services to orchestrate evidence collection, reduced manual auditor effort by 70%, improving performance and operational efficiency.
- Developed distributed data ingestion pipelines (AWS Step Functions, Lambda) for enterprise systems, ingested identity/activity data into graph models, ensuring reliability and scalability.
- Developed full-stack web client applications (React, GraphQL) for compliance, enabled identity visualization and evidence management for enterprise users, enhancing user-facing features.

Software Engineer Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built automated identity lifecycle system (Azure Serverless) syncing 500+ employees, reduced provisioning time by 80%, demonstrating efficient implementation and deployment best practices.
- Developed full-stack user-facing features (React, Golang) for MLOps infrastructure, improved annotation throughput by 20% for ML pipelines, enhancing performance and client applications.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack user-facing features for a cloud-based lab automation platform, utilized React, Ruby on Rails, Spring Boot, PostgreSQL in a microservices architecture, serving 500+ scientists.
- Designed and implemented features across 10+ core product modules for data tracking, ensured accurate management of experimental data, contributing to platform reliability and best practices.
- Authored 100+ test cases and resolved critical production issues, ensuring data integrity, maintained system reliability and performance in a regulated platform via continuous improvement.

Skills

Languages: Python, C#, Java, Golang, Ruby, TypeScript, JavaScript, SQL, Bash
Frameworks: React, ASP .NET Core, .NET 8/6, Node.js, GraphQL, Spring Boot, Ruby on Rails, Gin
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD, Deployment
Databases: PostgreSQL, MySQL, MongoDB, Redis, OpenSearch, Neo4j
Tools & Methodologies: Git, WSL2, Linux, Agile (Scrum/Kanban), TDD, SRE, REST APIs, Microservices, System Design, Object-Oriented Programming, Performance, Reliability, Testing, Collaboration, Ownership, Continuous Improvement

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
