Neel Gali

neelgali7@gmail.com

Skills

Languages: Python, Java, JavaScript, Ruby, SQL
Frameworks: ReactJS, Ruby on Rails, SpringBoot, TensorFlow
Tools: Docker, Kubernetes, Jenkins, Git, Jira
Methodologies and Practices: Agile, SDLC, MVC, REST, Maven, TDD, UML

Experience

Graduate Teaching Assistant, Oklahoma State University – Stillwater, OK Aug 2023 – May 2024

- Served as a Graduate Teaching Assitant at CS department for two Courses—Discrete Mathematics and Mobile Applications Development (MAD), helping students grasp complex concepts and practical skills
- Assisted students in the Mobile Applications Development course with the development of various iOS apps using Swift, offering hands-on support and technical advice throughout the development process
- Offered one-on-one tutoring sessions, group discussions, and guidance to help students succeed in both theoretical and practical aspects of the courses
- Evaluated student assignments, projects, and exams, providing constructive feedback to help improve their understanding and performance in the subjects

Software Developer Intern, Monarch Tractor – Livermore, CA Jun 2023 – Aug 2023

- Implemented an automated employee management system for an Ag tech startup, decreasing HR manual tasks by 40% and saving roughly 150 hours per month as an independent intern
- Integrated Microsoft Excel, Power BI, and Access with Python and SQL to consolidate and analyze 500+ employee records from various databases into a centralized dashboard that provided real-time insights
- Streamlined data exchange across UKG, JumpCloud, and Azure AD APIs for user management, device provisioning, user group administration, licensing, and cron job execution using Python scripts
- Employed serverless AWS services like Lambda for serverless computing, S3 for efficient data storage and retrieval, and CloudWatch for real-time logging and monitoring along with Splunk, Grafana, Dynatrace

Full Stack Developer, ZeMoSo Technologies – Hyderabad, India Aug 2021 – Aug 2022

- Designed UI components in React and RESTful APIs in Ruby on Rails, collaborating with cross-functional teams in a biotech startup to achieve a 20% increase in user base growth
- Enhanced user interface elements by designing and integrating new reusable React components into a custom React library and replacing legacy implementations to drive a 10% increase in design consistency
- Developed dynamic content using JavaScript, employing ES6+ features to write clean and efficient code, implement event handling, form validation, and AJAX requests to provide a seamless user experience
- Integrated new features for user roles and permissions management in Ruby on Rails, using custom Pundit policy scopes to filter data based on user roles and enforcing Role-Based Access Control (RBAC)
- Managed complex relational models, Implemented CRUD operations, structured JSON responses, versioned APIs and ensured consistent API behavior through comprehensive request validation and error handling
- Implemented comprehensive test suites using tools like FactoryBot, RSpec, minitest, and React Testing Library, Enzyme to validate both backend logic and frontend behavior improving code coverage by 90%
- Adhered to Agile methodologies and SDLC standards with active involvement in code reviews, sprint planning, daily stand-ups, and retrospective meetings, ensuring timely delivery of high-quality features

Related Coursework

Explainable AI May 2024

- Completed coursework in Explainable AI, mastering techniques like LIME and SHAP for model interpretability and exploring advanced topics like uncertainty estimation and causal inference in GNNs

Education

Master's in Computer Science, Oklahoma State University May 2024
