Neel Gali

SRE Engineer-AI/ML

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | AI/ML Platform SRE & MLOps

- Architected scalable **SRE** and **DevOps** practices for production **AI/ML** platforms, integrating **Kubernetes** and **Docker** to manage model deployments, boosting system uptime by 15%.
- Developed and maintained **CI/CD** pipelines using **GitHub Actions** and **ArgoCD** for continuous deployment of **LLM** applications, reducing deployment failures by 20%.
- Implemented **RAG patterns** with **vector search** and **embeddings** for **OpenAI** and **Anthropic** models, processing document pipelines to enhance answer relevance by 25%.
- Optimized **MLOps** workflows using **MLflow** and **Kubeflow** on **AWS EKS**, streamlining **model lifecycle management** from training to production, cutting iteration time by 30%.
- Engineered robust data ingestion pipelines with **Python** and **FastAPI** on **AWS Lambda** and **S3**, supporting diverse **AI/ML** data engineering platforms, increasing data throughput by 40%.
- Managed and monitored critical cloud infrastructure on **AWS** (**EC2**, **IAM**, **S3**) for large-scale **AI/ML** workloads, ensuring 99.9% availability for key services.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Cloud Infrastructure & Data Engineering

- Designed and implemented automated infrastructure provisioning for **AWS EKS** clusters, improving deployment efficiency and reducing manual configuration errors by 18% with **Python** scripts.
- Developed and maintained high-performance **Python FastAPI** services on **Kubernetes** within **AWS** environments, handling 50,000 requests per minute with 99.9% uptime.
- Implemented **CI/CD** pipelines using **Jenkins** and **GitLab CI** for microservices, standardizing deployment processes across development and production, reducing release cycles by 25%.
- Administered and troubleshot **Linux** servers and executed **shell scripting** for system automation, ensuring operational stability and reducing manual intervention by 30%.
- Integrated **OpenAI LLMs** into existing applications after November 2022, processing natural language inputs and generating relevant responses, boosting user engagement by 15%.
- Managed and optimized **AWS** services (**EC2**, **S3**, **Lambda**, **IAM**) to support scalable data processing and application hosting, achieving cost savings of 20%.
- Engineered **Spark** and **Ray** data pipelines for large-scale data engineering platforms, processing terabytes of data daily and improving analytics report generation by 35%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Enterprise SaaS Development & Automation

- Developed and deployed backend services using **Python** and **Flask** framework, supporting user authentication and data management features for a critical enterprise application, reducing latency by 10%.
- Automated system administration tasks on **Linux** servers using robust **shell scripting**, decreasing manual effort for routine maintenance by 40%.
- Implemented **CI/CD** workflows with **Jenkins** for automated build and deployment processes, significantly improving release frequency from bi-weekly to daily.
- Managed and optimized cloud resources on **AWS** (**EC2**, **S3**) for application hosting and data storage, ensuring high availability and efficient resource utilization, saving 15% on costs.
- Containerized applications using **Docker** for consistent deployment across various environments, standardizing the development-to-production pipeline and reducing environment setup time by 20%.
- Implemented comprehensive monitoring and alerting systems for **Python** applications on **AWS EC2**, proactively identifying and resolving performance bottlenecks to ensure system stability and user satisfaction.
- Collaborated with cross-functional teams to define architecture and deploy secure **AWS IAM** policies, ensuring least-privilege access and compliance for enterprise **SaaS** applications, enhancing security posture.

Skills

Languages: Python, Shell Scripting
Frameworks & Tools: FastAPI, Flask, Kubernetes, Docker, GitHub Actions, Jenkins, GitLab CI, ArgoCD, MLflow, Kubeflow, Ray, Spark, Linux
Cloud & Infra: AWS, EKS, EC2, IAM, S3, Lambda
Databases & Search: Vector Search
Concepts: DevOps, SRE, CI/CD, MLOps, RAG Patterns, Embeddings, Document Pipelines, Model Lifecycle Management
AI Tools: LLMs, OpenAI, Anthropic

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
