Neel Gali

AI Forward Deployed Engineer (FDE)

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | AI-Powered Cybersecurity Solutions

- Led the design and implementation of an **AI system architecture** for a new **GenAI/LLM-powered cybersecurity solution**, integrating **OpenAI API** and **Vertex AI** to enhance threat detection by 30%.
- Engineered **Python microservices** for real-time threat intelligence processing on **AWS Lambda**, improving data ingestion latency by 45% for over 500 enterprise clients.
- Developed secure **REST APIs** using **Node.js** and **TypeScript** for **client engagement** platforms, increasing API response speed by 25% and supporting 10,000 concurrent users.
- Implemented **DevSecOps practices** and **CI/CD pipelines** with **Kubernetes** and **Git** for automated deployment, reducing security vulnerability findings by 20% across applications.
- Collaborated with **business stakeholders** to translate complex **cybersecurity concepts** into actionable **full stack development** requirements, achieving 95% alignment with client technical solutions.
- Designed and optimized **PostgreSQL** and **Elasticsearch** schemas for large-scale security event analytics, improving query performance by 35% for critical incident response workflows.
- Contributed to technical solution design and proof-of-concepts for prospective clients, demonstrating advanced **cloud-native patterns** on **AWS** which led to a 15% increase in deal conversion rates.

Software Engineer *Jul 2024 – Jun 2025*

Samay Systems LLC | Enterprise SaaS Platform Development

- Developed responsive **React** and **TypeScript** frontend components, improving user experience for core modules and increasing user engagement by 15% through intuitive interfaces.
- Integrated third-party services via **REST APIs** into a **Spring Boot** application, streamlining data synchronization processes and reducing manual data entry efforts by 40%.
- Deployed and managed **microservices** on **AWS** using **Docker**, ensuring high availability and scalability for critical business operations, handling peak loads with 99.9% uptime.
- Implemented a recommendation engine using **Python** and **MongoDB** for a new product feature, enhancing user personalization and increasing feature adoption by 22%.
- Automated infrastructure provisioning using **serverless architectures** (**AWS Lambda**) for data pipelines, cutting operational costs by 18% and improving processing efficiency for client data.
- Contributed to the development of a conversational **AI agent** using **OpenAI API** (GPT-3.5/4) for customer support, reducing ticket resolution time by 10% and improving user satisfaction scores.
- Maintained and optimized **PostgreSQL** databases, implementing indexing strategies that improved query speeds by 25% for complex analytical reports and business intelligence dashboards.
- Streamlined **CI/CD pipelines** using **Git** and **Azure DevOps** for faster release cycles, reducing deployment time by 30% and enabling more frequent feature delivery.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Digital Transformation Solutions

- Developed core modules for a web application using **Java** and **Spring Boot**, contributing to a 10% increase in platform efficiency for processing client requests.
- Designed and implemented a responsive user interface with **JavaScript**, **HTML5**, and **CSS3** for an internal analytics dashboard, enhancing data visualization for 50+ users.
- Integrated various third-party APIs using **REST APIs** to fetch and display real-time financial data, ensuring data accuracy and timeliness for critical business decisions.
- Managed and optimized **MySQL** databases, improving data retrieval performance by 20% through efficient query design and schema adjustments for customer data.
- Collaborated on backend services development using **Python** (**Flask**) to support new features, achieving 99.9% API uptime for core functionalities and external integrations.
- Utilized **Git** for version control and collaborative development, ensuring code integrity and facilitating seamless integration of new features across development teams.

Skills

Languages: Python, JavaScript, Java, TypeScript, SQL
Frameworks & Tools: Node.js, React, Spring Boot, Flask, Django, Docker, Git, CI/CD pipelines, Azure DevOps
Cloud & Infra: AWS, serverless architectures, Kubernetes, AWS Lambda, PostgreSQL, MongoDB, Elasticsearch
Concepts: full stack development, microservices, REST APIs, secure software development lifecycle, DevSecOps, client engagement, cybersecurity concepts
AI Tools: GenAI/LLM-powered solutions, OpenAI API, Vertex AI, AI system architectures, AI agent

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
