Neel Gali

Machine Learning Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Platform

- Designed and implemented **RAG architectures** for a **generative AI** threat intelligence platform using **Python** on **AWS Lambda**, improving contextual accuracy of insights by 35% through rigorous **evaluation** metrics.
- Led **fine-tuning** and **prompt engineering** for large language models on **AWS SageMaker** with **Python**, enhancing model performance in **production** by 20% for critical geopolitical risk analysis.
- Developed advanced **text analytics** and **NLP classification** services using **Python** deployed via **AWS ECS** for production, achieving 92% accuracy in **entity resolution** across diverse datasets.
- Engineered **real-time data processing data pipelines** leveraging **AWS S3** and **Lambda** for **event-driven architectures**, supporting upstream **machine learning models** with 150ms latency.
- Built and deployed a **summarization** and **extraction** engine in **Python** on **AWS** for **ML/AI features**, reducing manual data compilation time by 40% in a product context.
- Collaborated **across the stack** to integrate **AI/ML features** into **front-end interfaces** via robust **APIs** using **JavaScript** and **Python**, improving user engagement by 25%.
- Optimized existing **machine learning models** through extensive **evaluation** and re-training cycles in **Python**, boosting prediction confidence for **ML engineering** tasks by 18% in production.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | B2B Platform

- Developed **machine learning models** for **data science** applications using **Python**, deployed on **AWS Lambda** and **S3**, improving predictive accuracy in production by 15%.
- Implemented **generative AI** features utilizing **OpenAI API** with **Python** for **prompt engineering**, achieving 90% user satisfaction in a product context after rigorous **evaluation**.
- Engineered **text analytics** and **NLP extraction** services using **Python** for enterprise content, running on **AWS ECS**, reducing manual data entry time by 30%.
- Built robust **data pipelines** for **real-time data processing** using **Python** and **AWS S3/Lambda**, supporting **event-driven architectures** and reducing latency by 25%.
- Designed and implemented RESTful **APIs** in **Python** and integrated with **JavaScript front-end interfaces**, working **across the stack** to enhance user experience by 20%.
- Conducted thorough **evaluation** of **machine learning models** in **production**, identifying areas for improvement and boosting model reliability by 10% through iterative refinement using **Python**.
- Developed a **summarization** module in **Python** for **ML/AI features** on **AWS**, improving content consumption efficiency by 35% within a specific product context.
- Assisted in deploying **machine learning models** on **AWS SageMaker** for **data science** projects, ensuring seamless integration into **production** environments and 99.9% uptime.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | SaaS Platform

- Developed high-performance **Python APIs** and **data pipelines** for critical application modules, integrating with **AWS S3** for **real-time data processing** to improve data availability by 40%.
- Implemented interactive **JavaScript front-end interfaces** consuming RESTful **APIs**, collaborating **across the stack** to deliver new features, boosting user engagement by 18%.
- Contributed to building **event-driven architectures** utilizing **AWS SQS** and **Lambda** with **Python** for scalable messaging, reducing processing bottlenecks by 30%.
- Engineered reliable **Python data pipelines** for backend services, optimizing **SQL** queries and data transformations to reduce report generation time by 25% for business intelligence.
- Managed application **deployment** on **AWS EC2** using **Docker** containers and contributed to **CI/CD** improvements, enhancing release frequency by 20% while maintaining stability.
- Developed responsive **JavaScript front-end** components based on **UI/UX** designs, consuming microservices **APIs** to support new features, increasing customer satisfaction scores by 10%.

Skills

Languages: Python, JavaScript, SQL
Frameworks & Tools: AWS SageMaker, Docker, OpenAI API
Cloud & Infra: Amazon Web Services, AWS Lambda, AWS S3, AWS ECS, AWS SQS, AWS EC2
Concepts: Data Pipelines, APIs, Front-end Interfaces, Event-driven Architectures, Real-time Data Processing, CI/CD
AI Tools: Machine Learning, Data Science, Generative AI, Large Language Models, Fine-tuning, Prompt Engineering, RAG Architectures, Evaluation, NLP, Text Analytics, Classification, Extraction, Summarization, Entity Resolution

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
