Lohit Gali

DevOps Engineer

lohitgali@gmail.com | +1(475)-291-1455 | Stillwater, OK

PROFESSIONAL SUMMARY

Dedicated DevOps Engineer with 2+ years of experience in site reliability and infrastructure automation. Expert in designing and implementing CI/CD pipelines using Jenkins, proficient in scripting languages like Python and Bash for configuration and deployment management. Adept with containerization technologies including Kubernetes, AWS EKS, and Docker, applying strong analytical and troubleshooting skills to build resilient and scalable systems.

TECHNICAL SKILLS

CI/CD & DevOps Tools: Jenkins, GitHub Actions, Azure DevOps, Git, Apache Kafka

Cloud & Containerization: AWS EKS, Docker, Kubernetes, Azure, GCP

Infrastructure as Code: Terraform, Ansible

Scripting & Automation: Python, Bash, Groovy, PowerShell

Monitoring & Troubleshooting: Prometheus, Grafana, ELK Stack, analytical and troubleshooting skills

PROFESSIONAL EXPERIENCE

DevOps Engineer | Epik Solutions

Jun 2025 - Present

• Architected and maintained robust CI/CD pipelines using Jenkins and GitHub Actions, automating software delivery across multiple environments; reduced deployment time by 40% and minimized manual errors for development teams, improving release frequency and stability.

• Implemented infrastructure as code (IaC) solutions with Terraform to provision and manage AWS resources, including AWS EKS clusters and associated services; achieved 99.9% infrastructure consistency and accelerated environment setup by 60% for new projects.

• Managed and optimized containerization strategies using Docker and Kubernetes for scalable microservices architectures; enhanced application availability by 25% and reduced resource consumption by 15% across production workloads.

• Developed custom automation scripts in Python and Bash for system configuration, monitoring, and routine operational tasks; improved operational efficiency by 30% and enabled proactive identification of potential issues, enhancing system uptime.

• Provided advanced analytical and troubleshooting skills to diagnose and resolve complex production incidents and performance bottlenecks across distributed systems; restored critical services within defined SLAs, maintaining high system reliability for end-users.

• Collaborated with development and security teams to integrate security best practices into the CI/CD pipeline and infrastructure provisioning; reduced security vulnerabilities by 20% and ensured compliance with industry standards.

Cloud DevOps Engineer | Samay Systems LLC

July 2024 - Jun 2025

• Designed and deployed scalable cloud infrastructure on AWS and Azure using Terraform for configuration and deployment management; enabled rapid provisioning of environments, reducing setup time by 50% for client projects.

• Developed and maintained CI/CD tools and integration workflows using Azure DevOps for automated builds, tests, and deployments; increased code delivery speed by 35% and improved code quality through continuous feedback.

• Implemented containerization strategies with Docker and orchestrated deployments using Kubernetes, managing applications across multi-tenant environments; achieved 99.99% application uptime and optimized resource utilization by 20%.

• Wrote comprehensive Python and Groovy scripts for automating operational tasks, data synchronization, and

system health checks; streamlined routine maintenance, saving approximately 10 hours per week for the operations team.

• Applied strong analytical and troubleshooting skills to resolve complex infrastructure issues and optimize application performance within cloud environments; minimized downtime by 25% and enhanced system stability for critical business applications.

• Collaborated with development teams to ensure seamless integration of applications with underlying cloud infrastructure, providing guidance on best practices for scalability and resilience; improved cross-functional efficiency by 15%.

DevOps Intern | Monarch Tractor

Jun 2023 - Aug 2023

• Assisted in the development and maintenance of CI/CD pipelines using Jenkins for automated testing and deployment of ML models and related services; contributed to a 10% reduction in deployment lead time.

• Supported containerization efforts by building Docker images for various microservices and ML inference applications; improved portability and consistency of development environments.

• Gained hands-on experience with Kubernetes, assisting in the deployment and scaling of containerized applications on cloud platforms; contributed to ensuring high availability of ML services.

• Wrote Bash scripts to automate routine system administration tasks and improve environment setup for development teams; reduced manual configuration effort by 20%, accelerating onboarding.

• Utilized analytical and troubleshooting skills to identify and resolve minor system issues within development and staging environments; supported stable operational workflows for the engineering team.

• Collaborated with senior engineers to implement basic configuration management practices using Ansible, ensuring consistency across development servers; learned fundamental principles of infrastructure automation.

Associate Cloud Engineer | ZeMoSo Technologies

Jul 2021 - Aug 2022

• Supported cloud infrastructure operations on AWS and Azure, assisting with resource provisioning and management; contributed to maintaining a stable and scalable environment for the platform.

• Assisted in monitoring system performance and health, using various tools to identify potential issues; helped ensure 99.5% uptime for critical backend services.

• Developed basic automation scripts in Python to streamline data processing workflows and system reporting; reduced manual data handling time by 15%.

• Collaborated with senior engineers on implementing best practices for configuration management and version control; improved consistency of development environments.

EDUCATION

Master’s in Computer Science | Oklahoma State University, Stillwater, OK

Bachelor’s in Computer Science | JNTU Hyderabad, India
