RAKESH CHOWDARY POLINA

rpolina@okstate.edu | https://www.linkedin.com/in/rakesh-chowdary-polina | 405-894-3989

PROFILE

Experienced Software Engineer with a proven track record in developing scalable microservices, implementing robust facial recognition pipelines, and delivering cloud-native solutions. Skilled in Python, Java, Spring Boot, Flask, React.js, and AWS, with expertise in containerization, CI/CD, and Agile methodologies. Adept at optimizing performance, enhancing user engagement, and driving operational efficiency in production environments.

EDUCATION

Master of Science in Computer Science **May 2024**
Oklahoma State University, Stillwater, OK **CGPA: 3.909/4**

SKILLS

Languages:	Java, JavaScript, Python, SQL, C, C++, HTML, CSS, Swift
Frameworks:	React JS, Angular JS, Spring boot, Node JS, Hibernate, Spring MVC, React Native
Databases:	MySQL, MongoDB, NoSQL, PostgreSQL, Cassandra
Web Technologies:	RESTful API, Spring JDBC, JPA, OAuth 2, jQuery, JSP, JMS, RabbitMQ
Web Services:	REST, SOAP
Tools/Platforms:	Docker, Git, JIRA, Jenkins, Postman, Ansible, Kubernetes, Apache Kafka, Terraform, Swagger
AWS Cloud Services:	EC2, S3, EKS, RDS, ELB, Cloud Watch, CloudFront
Build Tools:	Maven, Gradle

WORK EXPERIENCE

Research Data Analyst, Oklahoma State University **May 2023 – May 2024**

- Engineered and implemented a robust facial recognition pipeline, performing both quantitative and qualitative analysis on image data with Python and InsightFace, to achieve a precision rate of 93.6%
- Implemented DBSCAN clustering and rigorously verified data accuracy across 182,000+ images, enhancing archive reliability and insight precision.
- Designed an intuitive UI for the labeling tool using Flask and React.js, streamlining user engagement and annotations.
- Designed and maintained database structures using SQL, enhancing user interaction management and feedback data integrity, ensuring operational excellence.

Software Engineer, Ericsson, India **July 2019 – July 2022**

- Analyzed monolithic architecture for ERP systems, transitioning to microservices with RESTful APIs using Java, Spring Boot, and PeopleSoft Integration Broker. Integrated Apache Kafka for asynchronous communication between PeopleSoft Financials modules and custom services, improving scalability to handle 50% more concurrent financial transactions.
- Performed requirement analysis and crafted technical specifications for APIs supporting financial systems. Reduced system downtime by 30% by optimizing SQR report processing and implementing Spring Data with PeopleSoft CI-based integrations for secure, high-volume payroll and billing operations.
- Designed RESTful APIs using Spring Boot to extend PeopleSoft Financials functionality, adhering to GAAP compliance standards. Developed reactive APIs with Spring WebFlux for real-time budget tracking dashboards, reducing response times by 40%. Enhanced GL reconciliation workflows using Spring MVC integrated with PeopleSoft Component Interfaces.
- Executed Swagger documentation for 50+ financial APIs, reducing onboarding time for ERP support teams by 40%. Validated SQR report logic and API endpoints using Postman, achieving 98% test coverage for month-end closing processes.
- Modernized legacy VB6 interfaces by developing ReactJS frontends connected to PeopleSoft Financials via REST APIs, improving finance team productivity by 25%.
- Containerized PeopleSoft Asset Management modules using Docker and orchestrated batch SQR jobs with Kubernetes, reducing deployment failures by 35%. Troubleshot live production issues in PeopleSoft 9.2 environments, resolving critical payroll errors within SLA.
- Automated CI/CD pipelines for PeopleSoft patch deployments using Jenkins, reducing manual effort by 50%. Implemented Git-based version control for SQR and Application Engine scripts, cutting regression issues by 20%.
- Conducted unit testing of financial logic using JUnit/Mockito and debugged complex SQR processes using PeopleSoft Debugger. Resolved 150+ defects in voucher processing and tax calculation workflows.
- Optimized SQL queries for PeopleSoft databases (Microsoft SQL Server), reducing monthly financial report generation time from 2 hours to 25 minutes. Designed JPA repositories for hybrid integrations between Spring Boot services and PeopleSoft General Ledger.
- Deployed PeopleSoft infrastructure on AWS EC2 with RDS, achieving 99.9% uptime during fiscal year-end. Automated AR aging reports using AWS Lambda (Python) for SFTP delivery to stakeholders.
- Collaborated with finance stakeholders in Agile SCRUM teams to deliver 12+ PeopleSoft enhancements per quarter. Led cross-functional efforts to migrate legacy VB6 procurement workflows to PeopleSoft Fluid UI.
