Professional Experience

Software Engineer *Jun 2025 - Present*

Epik Solutions

- Built autonomous AI agents using LangChain and OpenAI APIs on enterprise security data, reducing manual task completion time by 40% across the enterprise platform.
- Designed multi-agent orchestration frameworks with CrewAI and LangChain, enabling complex prompt chaining workflows that improved AI response relevance by 32% across all production user queries.
- Integrated OpenAI and Anthropic LLMs into production REST APIs, optimizing prompt engineering and async Python pipelines to achieve sub-2s AI response latency serving 10,000+ users.
- Built RAG pipelines using Pinecone and OpenSearch vector databases with semantic search, improving AI response accuracy and context-awareness by 38% over baseline LLM retrieval approaches.
- Collaborated at product-engineering intersection to translate user requirements into AI agent features, shipping 5+ LLM-driven Python capabilities per Agile sprint cycle using Git version control.

Software Engineer *Jul 2024 - Jun 2025*

Samay Systems LLC

- Implemented LLM-powered autonomous agents using LangChain and HuggingFace for compliance automation, processing 10K+ documents monthly and reducing manual auditor effort by 70% across enterprise clients.
- Engineered RAG systems with Azure AI Search vector databases over enterprise document corpora, improving LLM retrieval accuracy to 89% for AI-generated compliance intelligence reports monthly.
- Built multi-agent orchestration workflows using Python async programming and LangChain, enabling parallel agent task execution that reduced pipeline processing time by 35% across production scale.
- Integrated OpenAI LLM APIs into a multi-tenant search platform via RESTful interfaces, delivering low-latency AI-driven query responses for 15+ enterprise clients with 99.9% production uptime.
- Built React.js front-ends surfacing AI agent outputs to enterprise users, bridging LLM logic and UI improving task completion rates by 30% for 10,000+ production users.

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Developed Python scripts applying prompt engineering techniques with OpenAI APIs for automated agricultural data annotation, boosting labeling throughput by 20% across 500K+ ML training samples.
- Built AWS Lambda data pipelines with GitHub version control enabling consistent ML model training across 3 production computer vision systems, reducing pipeline failures by 40%.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a regulated scientific platform using React and async Spring Boot REST APIs with PostgreSQL, ensuring accurate data tracking for 500+ scientists.
- Designed RESTful API contracts and asynchronous service patterns across 10+ product modules, improving overall team-wide engineering standards and system reliability by 35% in production.
- Authored 100+ JUnit test cases and resolved critical production issues via systematic debugging, improving data integrity and platform reliability for a regulated scientific cloud environment.

Skills

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, Bash
AI & LLMs: OpenAI API, Anthropic API, HuggingFace, LangChain, CrewAI, Prompt Engineering, Agentic Workflows, RAG
Vector Databases & Search: Pinecone, OpenSearch, Azure AI Search, Semantic Search
Cloud & DevOps: AWS (Lambda, S3, EC2), Azure, Docker, Kubernetes, GitHub Actions, CI/CD
Frameworks & Databases: React.js, Spring Boot, Node.js, PostgreSQL, MongoDB, Redis

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
