Venkata Sai

Software Engineer II

venkatasai.jobs@gmail.com | +1(512)-848-0295 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Persistent Systems | AI Infrastructure & Services

- Designed a **large language model API platform** using **Azure Kubernetes Service** for scalable inference, enhancing **service availability** by 99.9% for 1M daily requests.
- Implemented **agentic AI** workflows with **LangGraph** and **Python** to automate complex customer support, reducing response times by 40% for 500K users.
- Developed **CI/CD** pipelines using **Azure DevOps** for **LLM API platform** components, automating deployments and decreasing release cycle time by 30%.
- Integrated **OpenAI API** with internal systems, applying **Responsible AI** principles to ensure ethical **large language model** usage, improving compliance scores by 25%.
- Architected **microservices** on **Azure App Service** for a new feature, ensuring **security and privacy best practices**, supporting 50K concurrent users effectively.
- Led **threat modeling** and implemented **security best practices** for a critical **LLM API platform** component, mitigating 15 potential vulnerabilities with 95% effectiveness.

Software Engineer *Jul 2022 – Jun 2025*

Globant | Enterprise Data Platform

- Engineered **scalable software applications** using **Java Spring Boot** and **Kafka** for event streaming, handling 5M daily transactions efficiently, ensuring robust data flow.
- Designed and optimized **microservices** architecture on **Azure Cosmos DB** for critical customer data, improving data retrieval speeds by 3x for 200K active users effectively.
- Implemented robust **CI/CD** processes with **Jenkins** for **distributed systems** components, accelerating deployment frequency by 50% across 10+ services.
- Optimized database queries and **caching** strategies using **Redis** for **PostgreSQL**, boosting application performance by 25% for critical business operations.
- Successfully integrated **OpenAI API** for intelligent content generation, improving marketing campaign creation efficiency by 35% and engaging 100K new leads through innovative AI solutions.
- Managed **cloud computing** resources on **Azure Virtual Machines**, implementing **load-balancing** with **Azure Load Balancer** to ensure 99.9% **service availability**.
- Contributed to **service architecture** design for **SaaS services**, focusing on modularity and **operational excellence**, leading to 20% faster feature development.

Software Engineer *Jul 2020 – Aug 2022*

Nagarro | CRM Solutions

- Developed **scalable applications** using **Java** and **Spring Framework** for a CRM system, handling 1M customer records and 10K concurrent users efficiently.
- Implemented RESTful **APIs** for **microservices** communication using **Spring Boot**, integrating with third-party systems and improving data exchange speed by 20%.
- Designed **data platforms** using **MySQL** and **JPA** for persistent storage, optimizing schema and queries to reduce report generation time by 30%.
- Automated **CI/CD** workflows with **GitLab CI** for backend services, reducing manual deployment efforts by 40% and improving release consistency.
- Maintained and debugged **distributed systems** components, resolving production issues quickly and contributing to a sustained 99.5% **service uptime** for clients.
- Wrote comprehensive unit and integration tests using **JUnit** and **Mockito** to ensure code quality and **reliability**, reducing post-release defects by 25%.

Skills

Languages: Python, Java
Frameworks & Tools: Kafka, Azure DevOps, Spring Boot, Jenkins, Redis, Spring Framework, JPA, GitLab CI, JUnit, Mockito
Cloud & Infra: Azure Kubernetes Service, Azure Cosmos DB, Azure Virtual Machines, Azure Load Balancer, Azure App Service, PostgreSQL, MySQL
AI Tools: LangGraph, OpenAI API, Responsible AI, Agentic AI, Large Language Models (LLMs)
Concepts: Microservices Architecture, Distributed Systems, CI/CD, Observability, Service-Oriented Architecture, System Reliability, Operational Excellence, Security Best Practices, Threat Modeling, Load Balancing, Data Caching, RESTful APIs, Containerization, Message Queuing, Real-time Processing, High-Throughput Systems, Scalable Solutions, Big Data, Cloud Computing, Data Engineering, API Design

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
