Neel Gali

neellohit69@gmail.com

Skills

Programming Languages: Java, Ruby, Python, C#, C++, SQL
Operating Systems: Linux, Unix, Windows, macOS
Databases: MySQL, MongoDB, PostgreSQL, Oracle
Web Technologies: HTML, CSS, JavaScript, jQuery, XML, AJAX, JSON, Bootstrap, RESTful API, Redux
Frameworks: Spring Boot, React.js, Node.js, Hibernate, Express.js, Spring Beans, Spring Security, Angular, .NET Core, ASP.NET Core, Django, Vue.js, Next.js, jQuery
Cloud Technologies: AWS (S3, EC2, RDS, Lambda, Redshift, EKS, ECS, CloudWatch), Azure AD
Tools and Methodologies: Docker, Kubernetes, Jenkins, Groovy, Splunk, Grafana, Dynatrace, Kafka, RabbitMQ, Git, Jira, GitHub, Selenium, Postman, Maven, TDD, SDLC, Agile, Scrum, Kanban

Experience

Software Developer, Oklahoma State University – Stillwater, OK Aug 2023 – May 2024

- Implemented large-scale web applications using Java for backend technology and Angular for frontend, ensuring consistent experience and performance across 10+ devices and browsers
- Leveraged MVC architecture, Spring Beans for dependency injection, AOP for logging and Spring Security for robust access control, authentication solutions and addressing security considerations
- Adopted Hibernate for object-relational mapping (ORM), managed Oracle databases, coordinating and optimizing large volumes of queries, indexes, and data processing for a 15% increase in data retrieval speeds
- Developed RESTful APIs with Express.js, optimizing routing and middleware management to reduce server response times by 20%, while enhancing frontend-backend synchronization and improving API scalability
- Adhered to Agile (SCRUM) methodologies to manage and deliver projects and participated in sprint planning, daily stand-ups, and retrospective meetings, ensuring timely delivery of high-quality features

Software Developer Intern, Monarch Tractor – Livermore, CA Jun 2023 – Aug 2023

- Implemented an automated employee management system for an Ag tech startup, decreasing HR manual tasks by 40% and saving roughly 150 hours per month as an independent intern
- Integrated Microsoft Excel, Power BI, and Access with Python and SQL to consolidate and analyze 500+ employee records from various databases into a centralized dashboard that provided real-time insights
- Streamlined data exchange across UKG, JumpCloud, and Azure AD APIs for user management, device provisioning, user group administration, licensing, and cron job execution using Python scripts
- Employed serverless AWS services like Lambda for serverless computing, S3 for efficient data storage and retrieval, and CloudWatch for real-time logging and monitoring along with Splunk, Grafana, Dynatrace

Full Stack Developer, ZeMoSo Technologies – Hyderabad, India Jul 2019 – Aug 2022

- Designed UI components in React and RESTful APIs in Ruby on Rails and Spring Boot, collaborating with cross-functional teams in a biotech startup to achieve a 20% increase in user base growth
- Integrated new features for user roles and permissions management in Ruby on Rails, using custom Pundit policy scopes to filter data based on user roles and enforcing Role-Based Access Control (RBAC)
- Enhanced user interface elements by integrating new UI components into a custom React library and replacing legacy implementations to drive a 10% increase in design consistency and user experience
- Developed microservices in Spring Boot and leveraged AWS services such as Redshift for data warehousing, EKS for orchestration, and ECS for container management resulting in a 30% increase in scalability
- Employed Maven for build automation and dependency management; crafted unit test cases using Test-Driven Development (TDD) practices with React Testing Library, Enzyme, RSpec, JUnit, and Mockito
- Designed high-quality web applications using Python and Django and .NET to address challenges in the E-Commerce Platform Modernization project, leading to a 30% reduction in operational costs
- Built RESTful APIs in ASP.NET Core, crafted efficient and accessible front-end applications in Angular, adopted Agile methods and SDLC standards with active involvement in code reviews and pair programming
- Integrated .NET Core services with existing applications to support multi-platform development to ensure compatibility across 5+ major internet browsers, which reduced cross-browser issues by 40%

Education

Master's in Computer Science, Oklahoma State University May 2024
