Neel Gali

Software Engineer | Test Automation & AI

neelgali7@gmail.com | +1 (475) 291-1455 | sunnyvale, CA | linkedin.com/in/neelgali

Summary

Software engineer with **5 years of experience** across enterprise security, AI compliance SaaS, and LabOps. Combines **Python E2E automation, React/Next.js development, and agentic AI** with Node.js, GraphQL, REST APIs, and containerized delivery. Hands-on with unit testing, TDD, cross-platform testing, and visual regression.

Professional Experience

AI Automation Engineer *2025 - Present*

Epik Solutions | Enterprise Security

- Developed **TypeScript/Cypress automation** for multi-step authentication and session-state capture, enabling automated security crawling of complex single-page applications.
- Built **Python and Go microservices** integrating enterprise security platforms, automating 40% of SOC workflows and reducing mean time to resolution by 15 minutes.
- Implemented **AI-driven incident triage** with Python, n8n, and Azure OpenAI, processing 1,000+ daily security events and reducing analyst workload by 30%.
- Delivered **React analytics dashboards** aggregating telemetry from 15+ systems, eliminating 20+ hours of weekly reporting and making operational results accessible to business stakeholders.
- Deployed services with **Docker, Kubernetes, and GitHub Actions** on Azure; resolved silent execution failures in distributed Go runbooks, improving automation success rates by 25%.

Founding Engineer (Full Stack AI) *2023 - 2025*

Samay Systems LLC | AI Compliance SaaS

- Integrated **Cypress smoke-test suites into GitHub Actions** to continuously validate tenant-isolation boundaries across a multi-tenant compliance platform.
- Delivered **React/TypeScript and AppSync GraphQL** workflows for compliance controls, evidence review, policy authoring, and integration configuration.
- Built **LangChain and AWS Bedrock** compliance automation for evidence collection, summarization, and control scoring, reducing manual auditor effort by 70%.
- Implemented a **LangChain/OpenAI natural-language query interface** through a Flask API, enabling compliance analysts to query Neo4j identity graphs without writing Cypher.
- Orchestrated **Lambda and Step Functions integrations** with Microsoft Entra ID, GitHub, and Jira, modeling identity and activity data in tenant-specific knowledge graphs.
- Designed **tenant isolation** across PostgreSQL, Neo4j, and S3, and provisioned backend infrastructure with AWS CDK, Lambda, ECS, and AppSync.

Software Engineer *2020 - 2022*

ZeMoSo Technologies | LabOps Platform

- Authored **100+ test cases**, resolved production defects, and integrated **Jenkins quality checks** into delivery pipelines for a regulated scientific platform.
- Built a **TypeScript wrapper for Playwright/Cypress** to validate scientific workflows and capture DOM snapshots for proof-of-concept verification.
- Delivered **React, Spring Boot, and Ruby on Rails** features for a cloud-based robotic lab platform used by 500+ scientists, backed by PostgreSQL microservices.
- Implemented **REST APIs and background jobs** for experiment lifecycle workflows, separating long-running lab data processing from interactive frontend screens.
- Delivered functionality across **10+ product modules**, including inventory, compounds, batch tracking, LCMS uploads, and container linkage, preserving experimental-data traceability.
- Partnered with product and QA teams to translate lab requirements into testable features and coordinate **weekly Agile releases** across a multi-module SaaS platform.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, Go, SQL
Test Automation: pytest, Selenium, Playwright, Cypress, E2E/Regression Testing, Unit Testing, TDD
Quality & Releases: Sauce Labs, Applitools, Looper, Manual Testing, PR Reviews, Git, Agile/Scrum
Web & APIs: React, Next.js, Node.js, GraphQL, REST APIs, Flask, Spring Boot, PostgreSQL
Agentic AI: LangChain, LangGraph, CrewAI, AutoGen, Multi-Agent Workflows, Custom Tool Calling, MCP
Cloud & Delivery: AWS, Azure, Docker, Kubernetes, GitHub Actions, Jenkins, AWS CDK, OpenAI, Bedrock

Education

Master's in Computer Science, Oklahoma State University *Aug 2022 - May 2024*
Bachelor's in Computer Science, JNTU Hyderabad *Jul 2017 - Jun 2021*
