Venkata Sai

Senior Software Engineer (Big Data)

venkatasai.jobs@gmail.com | +1(512)-848-0295 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

EPAM Systems | AI-driven Data Engineering Platform

- Architected and led development of **AI powered agents** using **LangGraph** and **generative AI** models, automating complex **workflow automation** tasks across **large scale backend data systems**, reducing manual effort by 35%.
- Designed and implemented **real time and batch pipelines** on **Cloudera Data Platform (CDP)** with **Spark** for **massive transactional datasets**, enhancing **operational intelligence** and data availability by 40%.
- Developed robust **Scala** and **Python backend services** in **AWS environments** to support **AI enabled services**, ensuring scalability and processing over 100M data points daily.
- Optimized **distributed data platforms** performance utilizing **Cloudera Manager** for **curated datasets** ingestion, improving data processing latency by 25% for critical analytics applications, enhancing user experience.
- Mentored junior engineers in **AI agent creation**, **big data** concepts, and **cloud based architectures** through **Agile/Scrum** practices, fostering a 20% increase in team productivity.
- Implemented advanced **Anomaly detection** systems using **Python** and **AWS services**, identifying critical data discrepancies proactively, and mitigating potential issues with 98% accuracy.
- Contributed to **cloud native** and **hybrid architectures** for **datamarts** integration, enabling seamless data flow between on-prem and **AWS environments**, improving data consistency by 30%.

Software Engineer *Jul 2022 – Jun 2025*

Globant | Enterprise Data & Analytics Platform

- Developed **Scala** and **Java real time and batch pipelines** for **massive transactional datasets** using **Spark** on **AWS environments**, improving data ingestion speed by 30%.
- Built and optimized **datamarts** and **curated datasets** on **distributed data platforms** utilizing **Python** and **Cloudera**, ensuring high **data integrity** for enterprise reporting with 99.9% accuracy.
- Implemented **backend services** using **Java** and **Scala** for data enrichment, integrating with **OpenAI API** to process text data, reducing manual tagging efforts by 20%.
- Contributed to **cloud based architectures** in **AWS** for **big data** processing with **Databricks**, managing workloads effectively and reducing infrastructure costs by 15% annually.
- Designed and maintained **data pipelines** on **Cloudera Data Platform (CDP)** with **Spark** for various **AI enabled services**, supporting advanced analytics requirements with 95% SLA adherence.
- Participated in **Agile/Scrum** ceremonies, collaborating with cross-functional teams to define requirements for **large scale backend data systems**, improving feature delivery cycles by 25% quarterly.
- Developed **Python** scripts for **Cloudera Manager** to automate platform configuration and monitoring tasks, enhancing operational stability and reducing manual intervention by 40% weekly.
- Engineered **intelligent automation** solutions using **Python** and **CrewAI** for data quality checks across **datamarts**, reducing error rates in downstream systems by 18%.

Software Engineer *Jul 2020 – Aug 2022*

Nagarro | Digital Transformation Services

- Developed robust **Java backend services** for customer-facing applications, processing high volumes of requests, and ensuring system uptime above 99.9% reliability consistently.
- Designed and implemented **Python data pipelines** for **batch workloads** on on-prem systems, optimizing data ingestion and transformation processes, reducing processing time by 20% efficiently.
- Authored comprehensive **technical documentation** for API endpoints and data flows, improving developer onboarding efficiency by 30% and significantly reducing support requests internally.
- Collaborated in **Agile/Scrum** teams to deliver scalable **backend systems**, contributing to requirements gathering and sprint planning, achieving a 90% on-time project completion rate consistently.
- Optimized **SQL** database queries and schema designs for **Java** applications, enhancing application performance and reducing response times for critical operations by 15% across modules.

Skills

Languages: Scala, Python, Java, SQL
Frameworks & Tools: Spark, Cloudera Manager, Databricks
Cloud & Infra: AWS, Cloudera Data Platform (CDP)
Concepts: Agile/Scrum, real time and batch processing, distributed data platforms, data integrity, workflow automation, Anomaly detection, operational intelligence, cloud based architectures, hybrid architectures, big data, intelligent automation, technical documentation
AI Tools: generative AI, LangGraph, OpenAI API, CrewAI

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
