Neel Gali

neelgali7@gmail.com

Skills

Programming Languages: Java, Ruby, Python, C#, C++, SQL
Operating Systems: Linux, Unix, Windows, macOS
Databases: MySQL, MongoDB, PostgreSQL, Oracle
Web Technologies: HTML, CSS, JavaScript, jQuery, XML, AJAX, JSON, Bootstrap, RESTful API, Redux
Frameworks: Spring Boot, React.js, Node.js, Hibernate, Express.js, Spring Beans, Spring Security, Angular, .NET Core, ASP.NET Core, Django, Vue.js, Next.js, jQuery
Cloud Technologies: AWS (S3, EC2, RDS, Lambda, Redshift, EKS, ECS, CloudWatch), Azure AD
Tools and Methodologies: Docker, Kubernetes, Jenkins, Groovy, Splunk, Grafana, Dynatrace, Kafka, RabbitMQ, Git, Jira, GitHub, Selenium, Postman, Maven, TDD, SDLC, Agile, Scrum, Kanban

Experience

Software Developer, Oklahoma State University – Stillwater, OK Aug 2023 – May 2024

- Developed and maintained web applications using React and Ruby on Rails, leading to a 20% reduction in page load times and increased organic traffic within the first quarter
- Managed complex relational models, Implemented CRUD operations, structured JSON responses, versioned APIs and ensured consistent API behavior through comprehensive request validation and error handling
- Integrated Rails applications with legacy databases by customizing ActiveRecord to work with non-standard table structures and legacy data formats to bridge the gap between new and old systems
- Performed data migrations from legacy systems to Rails-based databases, using scripts to extract, transform, and load (ETL) data while ensuring data consistency and minimizing downtime
- Created responsive front-end components using React and Redux, enabling users to interact seamlessly with the application across various devices and browsers
- Adhered to Agile (SCRUM) methodologies, engaged in code reviews, daily stand-ups, retrospective meetings, and ensuring TDD through automated testing frameworks like RSpec and Minitest

Software Developer Intern, Monarch Tractor – Livermore, CA Jun 2023 – Aug 2023

- Implemented an automated employee management system for an Ag tech startup, decreasing HR manual tasks by 40% and saving roughly 150 hours per month as an independent intern
- Integrated Microsoft Excel, Power BI, and Access with Python and SQL to consolidate and analyze 500+ employee records from various databases into a centralized dashboard that provided real-time insights
- Streamlined data exchange across UKG, JumpCloud, and Azure AD APIs for user management, device provisioning, user group administration, licensing, and cron job execution using Python scripts
- Employed serverless AWS services like Lambda for serverless computing, S3 for efficient data storage and retrieval, and CloudWatch for real-time logging and monitoring along with Splunk, Grafana, Dynatrace

Full Stack Developer, ZeMoSo Technologies – Hyderabad, India Jul 2019 – Aug 2022

- Designed UI components in React and RESTful APIs in Ruby on Rails, collaborating with cross-functional teams in a biotech startup to achieve a 20% increase in user base growth
- Integrated new features for user roles and permissions management in Ruby on Rails, using custom Pundit policy scopes to filter data based on user roles and enforcing Role-Based Access Control (RBAC)
- Executed complex database schema changes using Rails migrations, ensuring consistent updates across all environments by adding and removing columns, changing data types, and creating or dropping indexes
- Enhanced user interface elements by designing and integrating new reusable React components into a custom React library and replacing legacy implementations to drive a 10% increase in design consistency
- Implemented comprehensive test suites using tools like FactoryBot, RSpec, minitest, and React Testing Library, Enzyme to validate both backend logic and frontend behavior improving code coverage by 90%
- Leveraged AWS services such as Redshift for data warehousing, EKS for orchestration, and ECS for container management, reducing deployment time and enhancing application scalability by 30%
- Implemented CI/CD pipelines using Jenkins and Docker, automating the build, test, and deployment process, which reduced deployment times by 40%.

Education

Master's in Computer Science, Oklahoma State University May 2024
