Neel Gali

Full Stack Software Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Platform

- **Architected** and **developed** a **scalable healthcare data ingestion pipeline** using **AWS Lambda**, **AWS S3**, and **Postgresql**. Integrated diverse systems via **EHR Integration** and **HL7 FHIR** standards, improving **data processing efficiency** by **40%**.
- **Led React.js** and **Typescript frontend development** for a critical **clinical dashboard**. Visualized complex **health data**, ensuring robust **Production Readiness**, **reducing user reporting time** by **25%**.
- **Implemented intelligent health record parsing service**, leveraging **Python** and **OpenAI API** on **AWS EC2**. Enhanced **structured data extraction accuracy** from unstructured notes by **35%**, improving **data quality** significantly.
- **Integrated Claude Code** and **Cursor** into **development workflows** for **full stack applications**. This **accelerated feature delivery**, **improved code quality**, and **decreased debugging time** by **20%** effectively.
- **Designed** and **maintained Microservices Architecture** for **patient engagement platform**. Utilized **Node.js** and **AWS SQS** to ensure high **Reliability**, efficiently **handling 1M daily requests**.
- **Championed cross-functional collaboration** with **clinicians** and product managers, aligning **Typescript frontend functionality** with complex **workflow requirements**. Achieved **95% stakeholder satisfaction** by ensuring precise **product functionality expectations**.
- **Developed RESTful APIs** using **Express.js** for **secure data exchange**. Adhered to **Health IT Interoperability standards** for **provider systems**, **improving data latency** by **15%**.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | B2B Platform

- **Pioneered Full Stack Development** using **React.js** and **Node.js** on **AWS EC2**, enhancing **enterprise client experience** and **boosting platform stability** by **30%**.
- **Optimized Postgresql database queries** for key reporting modules, **improving data retrieval performance** by **60%**. Ensured **system Reliability** for **500+ users**, enhancing responsiveness greatly.
- **Resolved technical ambiguities** in a dynamic **startup environment**, proposing **innovative solutions**. Adapted **System Design** using **AWS** and **Postgresql** to meet **evolving business needs** rapidly and effectively.
- **Implemented backend** utilizing **Microservices Architecture** with **Python** and **AWS Lambda**. Handled **complex business logic**, ensuring **Scalability** for applications, **processing 10M monthly requests** efficiently.
- **Designed** and **maintained Typescript frontend components**, ensuring high **reusability** and consistency across various platform features. Improved **Production Readiness**, **speeding up UI development** by **20%**.
- **Managed CI/CD pipelines** using **Docker** and **AWS CodePipeline**, **automating deployments**. Enabled frequent releases for **Scalability** in **enterprise SaaS applications**, **reducing deployment time** by **50%**.
- **Explored integration** of **AI Coding Tools** for **unit test generation** and **code refactoring**. Utilized internal prompts for **Typescript modules**, effectively **increasing test coverage** by **15%** and efficiency.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | SaaS Platform

- **Contributed to development** of **React.js** and **Typescript web applications**. **Implemented new features**, enhancing existing functionalities for diverse clients, **improving user engagement** by **15%** consistently.
- **Built** and **maintained Node.js backend services**, interfacing with **MySQL databases**. Supported **customer-facing portals**, **processing 100K daily transactions** without errors, ensuring high **system reliability**.
- **Deployed application components** onto **AWS EC2** instances. **Configured servers**, ensuring initial **system stability** and high **Reliability** for **critical business operations**, minimizing disruptions effectively.
- **Participated** in the entire **software development lifecycle**, from gathering requirements to testing **full stack applications**. **Resolved 50+ bugs**, contributing to **timely project delivery** and quality.
- **Designed database schemas** and **managed data migrations** for **Postgresql** and **MySQL systems**. Supported **new feature development**, ensuring **robust data integrity** across applications consistently.
- **Implemented RESTful APIs** for **client-server communication**, handling **authentication** and **data validation**. Ensured **API Security** and **efficient data exchange**, **reducing integration efforts** by **10%**.

Skills

Languages: Typescript, Python
Frameworks & Tools: React.js, Node.js, Express.js, RESTful APIs, Docker, CI/CD, HL7 FHIR
Cloud & Infra: AWS, AWS Lambda, AWS EC2, AWS SQS, AWS CodePipeline, AWS S3, Postgresql, MySQL
Tools & Methodologies: OpenAI API, Claude Code, Cursor, AI Coding Tools, Microservices Architecture, System Design, API Security, Production Readiness, Scalability, Reliability, EHR Integration, Health IT Interoperability

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
