Professional Experience

AI/ML Engineer *Jun 2025 - Present*
Epik Solutions | Enterprise Security

- Developed **Python ML models** over high-volume **telemetry and cybersecurity event data**, supporting **anomaly detection**, trend analysis, and operational reporting for internal security teams.
- Evaluated **emerging AI tools**, **LLM APIs**, and vendor-style platform capabilities against business use cases, documenting **feasibility**, data readiness, risks, and implementation tradeoffs.
- Built **prototype ML and computer vision workflows** using **PyTorch, TensorFlow, OpenCV**, and scikit-learn to validate detection, classification, and predictive analytics approaches.
- Translated operational requirements into **model objectives**, **evaluation metrics**, test cases, and concise stakeholder recommendations for **proof-of-concept initiatives**.

AI/ML Engineer *Jul 2024 - Jun 2025*
Samay Systems LLC | B2B SaaS Compliance

- Built **Python services** that collected, validated, and summarized evidence data from **AWS, Azure, GitHub, Jira**, and internal APIs for downstream ML and AI workflows.
- Implemented **RAG-style querying** over compliance data using **embeddings, vector search**, and SQL-backed stores, enabling natural-language analysis of audit and risk evidence.
- Designed **relational schemas and SQL workflows** for **multi-tenant compliance validation**, improving data quality, traceability, and repeatability across analytics pipelines.
- Supported deployments through **Docker, Kubernetes, CI/CD, and AWS** while participating in **code reviews**, testing, documentation, and release validation.

ML Intern *Jun 2023 - Aug 2023*
Monarch Tractor | Autonomous Vehicles

- Supported **computer vision and ML pipeline development** for semi-autonomous agricultural vehicles operating in real-world field environments.
- Built **Python preprocessing pipelines** that transformed raw **sensor and image data** into training-ready datasets for detection, segmentation, and prediction tasks.
- Trained and evaluated **object detection and segmentation models** using **PyTorch, TensorFlow, and OpenCV**, validating outputs against transport-adjacent operational constraints.

Associate Data Scientist *Jul 2021 - Aug 2022*
ZeMoSo Technologies | LabOps

- Built backend and **ML-adjacent data pipelines** for a **cloud scientific operations platform**, validating and structuring experimental records for analytics and decision support.
- Supported **proof-of-concept ML experimentation** by automating dataset preparation, feature generation, experiment tracking, quality checks, and **CI/CD validations**.
- Wrote reusable **Python and SQL data validation scripts** to clean inconsistent lab records, flag missing metadata, and improve reliability of downstream analytics datasets.
- Documented pipeline behavior, test results, and data assumptions for engineers and analysts, strengthening **SDLC discipline**, handoffs, and repeatable model experimentation.

Skills

Languages: Python, SQL, Java, JavaScript, Bash, PowerShell
ML & AI: PyTorch, TensorFlow, OpenCV, scikit-learn, Hugging Face, YOLOv8, Detectron2, LLM APIs, LangChain, RAG, vector search
Data & Cloud: PostgreSQL, MongoDB, DynamoDB, Kafka, REST APIs, Apache Airflow, AWS, Azure, GCP
DevOps & Practices: Docker, Kubernetes, Terraform, GitHub Actions, Azure DevOps, Jenkins, Git, CI/CD, OOP, SDLC, unit testing, code reviews
Relevant Coursework: Explainable AI (OSU), Practical Machine Learning with TensorFlow (Google), Deep Learning Specialization, Machine Learning (KTH Royal Institute of Technology)

Education

Master's in Computer Science, Oklahoma State University, Stillwater, OK
Bachelor's in Computer Science, JNTU Hyderabad, India
