Professional Experience

Software Engineer AI *Jun 2025 - Present*

Epik Solutions | Enterprise Security

- Implemented scalable **microservices** using **Go** and **Python**, integrating enterprise security platforms and **automating 40% of SOC workflows**, reducing **MTTR by 15 minutes** across internal security teams
- Built real-time **React** analytics dashboards aggregating **telemetry from 15+ systems**, eliminating 20+ hours/week of manual reporting and improving decision latency for C-suite stakeholders
- Developed **AI-driven incident triage pipelines** using **Python**, **n8n**, and **AWS Bedrock**, processing 1,000+ daily security events and reducing analyst workload by 30% with **TF Sentinel** governance
- Automated cross-functional enterprise workflows using **AWS Lambda**, **Step Functions**, **S3**, **CDK**, and CLI scripting, serving 500+ users and reducing operational cycle times by 40%
- Built serverless **Python** APIs on **AWS Lambda**, **DynamoDB**, and **API Gateway** with **CDK**, supporting bursty AI workflow traffic and enabling same-day infrastructure releases
- Deployed services on **AWS** with **Docker**, **Kubernetes**, and **GitHub Actions**, resolving silent execution failures in distributed **Go** runbooks and improving pipeline success rates by 25%

Software Engineer (Full Stack AI) *Jul 2024 - Jun 2025*

Samay Systems LLC | B2B SaaS Compliance

- Shipped a **multi-tenant AI compliance SaaS** platform serving 15+ enterprise clients, **scaling to 10,000+ users** per org on **AWS** with full tenant isolation and high availability
- Designed distributed backend systems using **Go**, **AWS CDK**, **Lambda**, **ECS**, **AppSync**, **SQS**, **PostgreSQL**, and **Neo4j** with strict isolation across relational, graph, and object storage layers
- Built **LLM-powered compliance automation** using **AWS Bedrock**, **LangChain**, **MCP**, **n8n** to orchestrate evidence collection, summarization, and control scoring, reducing manual auditor effort by 70%
- Developed distributed pipelines ingesting **5M+ daily identity events** into knowledge graphs and built **GraphRAG-based compliance chatbots**, reducing unauthorized user access footprints by 30%
- Developed full-stack **React** and **GraphQL** applications enabling compliance controls, evidence management, policy authoring, identity graphs, and document storage for enterprise users
- Owned **React/TypeScript** product workflows across evidence upload, review queues, and admin configuration, partnering with early enterprise users to ship high-priority features in weekly startup release cycles

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor | Autonomous Vehicles

- Built an automated identity lifecycle system syncing 500+ employees across **UKG**, **JumpCloud**, and **Azure AD** using serverless architecture on **AWS** and **Azure**, reducing provisioning time by 80%
- Developed full-stack features using **React** and **Go** for MLOps data labeling infrastructure, improving annotation throughput by 20% for ML training pipelines

Software Engineer *Jul 2020 - Aug 2022*

ZeMoSo Technologies | LabOps

- Delivered full-stack features for a **cloud-based robotic lab** platform used by 500+ scientists across **React**, **Ruby on Rails**, **Spring Boot**, and **PostgreSQL** in a microservices architecture
- Designed and implemented features across **10+ core product modules** (inventory, compounds, batch tracking, LCMS uploads, container linkage), enabling accurate tracking of complex experimental data
- Built scalable **REST APIs** and background jobs for experiment lifecycle workflows, decoupling long-running lab data processing from user-facing **React** screens and improving workflow responsiveness
- Implemented reusable **React** components for sample tracking, inventory search, and experiment dashboards, helping scientists navigate **high-volume operational data** with fewer manual spreadsheet exports
- Optimized **PostgreSQL** schemas, indexes, and query paths for compound, container, and batch records, reducing slow report generation across regulated LabOps workflows
- Partnered with product and QA teams in **weekly agile releases**, translating ambiguous lab automation requirements into production features for a complex multi-module scientific SaaS platform
- Authored **100+ test cases** and resolved **critical production issues**, integrated CI/CD pipelines using **Jenkins** to enforce quality checks and promote artifacts in a regulated scientific platform

Skills

Languages: Python, Java, Golang, Ruby, TypeScript, JavaScript, HTML, CSS, SQL, Bash, C++, C#,
AI & ML: LLMs (Azure OpenAI, AWS Bedrock), RAG, LangChain, MCP, TensorFlow, OpenCV
Frameworks: React, Gin, Django, Flask, Node.js, GraphQL, Spring Boot, Ruby on Rails, ASP .NET Core
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Github Actions, Jenkins, ServiceNow
Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, OpenSearch, Pinecone, Neo4j
Tools & Methodologies: Git, n8n, Power Platform, WSL2, Linux, Agile, Jira, TDD, CI/CD, SRE, ITSM

Education

Master's in Computer Science, Oklahoma State University, Stillwater *Aug 2022 - May 2024*
Bachelor's in Computer Science, JNTU Hyderabad, India *Jul 2017 - Jun 2021*
