Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Generative AI Platform Development

- Led development of a **generative AI agent** for customer experience using **LangChain** and **OpenAI API**, enhancing interaction quality for 1.5M users, boosting CSAT by 15%.
- Designed robust **ML infrastructure** on **GCP** for large-scale **model deployment** and **evaluation** of **speech/audio** models, decreasing inference latency by 30%.
- Implemented **reinforcement learning** algorithms within the **Gemini Enterprise** framework, optimizing **generative AI agent** decision-making for complex scenarios, improving accuracy by 22%.
- Architected **distributed computing** systems using **Kubernetes** and **Vertex AI** for real-time **data processing** of high-volume conversational data, processing 50K requests per second.
- Developed robust **Python APIs** for **model optimization** and **debugging** within **ML pipelines**, streamlining developer workflows and reducing debugging time by 25%.
- Collaborated with **cross-functional teams** to integrate new **AI capabilities** into **Gemini Enterprise** solutions, leading to a 20% adoption increase across diverse B2B clients.
- Implemented advanced **data structures** and **algorithms** for efficient feature extraction from **speech/audio** data, significantly improving downstream model performance by 18%.

Software Engineer *Jul 2024 – Jun 2025*

Samay Systems LLC | Enterprise AI/ML Platform

- Built **Python ETL pipelines** on **AWS Lambda** and **S3** processing 10M daily compliance records, reducing ingestion lag from 4 hours to 20 minutes.
- Designed and deployed **ML models** for **natural language processing** using **TensorFlow** on **AWS EC2**, improving sentiment analysis accuracy to 91% for client feedback.
- Developed **microservices** using **Java** and **Spring Boot** for **real-time data ingestion** into **Kafka** topics, supporting robust processing of 20K messages per second.
- Engineered robust **ML infrastructure** for **model deployment** using **Docker** and **Kubernetes** on **AWS EKS**, achieving 99.9% uptime for critical services.
- Integrated **OpenAI API** into a customer support chatbot for enhanced **natural language understanding**, reducing agent resolution time by 18% post-Nov 2022.
- Optimized **PostgreSQL** database queries for **large-scale data storage**, reducing report generation time by 40% and improving application responsiveness.
- Implemented **CI/CD pipelines** with **Jenkins** and **Git** for automated **model retraining** and **deployment**, accelerating release cycles by 35% weekly.
- Developed **data processing** modules in **Python** for feature engineering of diverse datasets, feeding **ML models** and boosting predictive accuracy by 12%.

Software Engineer *Jul 2021 – Aug 2022*

Zemoso Technologies | Enterprise SaaS Application Development

- Developed robust **RESTful APIs** using **Java** and **Spring Boot** for a customer management platform, handling 5M daily requests with 99.9% availability.
- Implemented **distributed caching** with **Redis** to optimize data retrieval for high-traffic modules, reducing latency by 50% for critical user operations.
- Designed and maintained **PostgreSQL** schemas for various application features, ensuring data integrity and supporting millions of user accounts efficiently.
- Developed **frontend components** using **React** and **JavaScript** for an intuitive user interface, enhancing user experience and engagement by 15% across the platform.
- Contributed to **DevOps** practices by automating deployment scripts using **Shell** and **Ansible**, accelerating release cycles by 25% for new features.
- Collaborated with **cross-functional teams** to define **system architecture** for new modules, ensuring scalability and integrating seamlessly with existing services.

Skills

Languages: Python, Java, JavaScript, Shell
Frameworks & Tools: LangChain, OpenAI API, Vertex AI, Kubernetes, TensorFlow, Spring Boot, Kafka, Docker, Jenkins, Git, React, Ansible
Cloud & Infra: GCP, AWS Lambda, S3, AWS EC2, AWS EKS, PostgreSQL, Redis
Concepts: Generative AI Agents, ML Infrastructure, Model Deployment, Reinforcement Learning, Distributed Computing, Data Processing, RESTful APIs, MLOps, Data Structures, Algorithms, ETL Pipelines, CI/CD

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
