Professional Experience

Automation Engineer (Full Stack / Distributed Systems) *Jun 2025 - Present*

Epik Solutions

- Designed and implemented scalable microservices with Python, integrating enterprise security platforms and automating 40% of SOC workflows and reducing MTTR by 15 minutes for internal security teams
- Developed Generative AI incident triage pipelines using LLMs and n8n, processing 1,000+ daily events, cutting analyst workload by 30%.
- Built real-time analytics dashboards using React, aggregating telemetry from 15+ systems, eliminating 20+ hours/week manual reporting for C-suite.
- Automated enterprise cross-functional workflows using Power Platform and PowerShell scripting, serving 500+ users, reducing operational cycle times by 40%.
- Deployed services using Azure cloud-native infrastructure, Docker, Kubernetes, and CI/CD pipelines, resolved silent execution failures in distributed Go runbooks, improving pipeline success rates by 25%.

Founding Engineer (Full Stack AI) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected multi-tenant AI compliance SaaS platform for 15+ enterprise clients, scaling 10,000+ users on AWS, ensuring data and AI governance, tenant isolation and high availability.
- Designed serverless backend systems on AWS, built a hybrid data model (relational + Neo4j graph) enabling knowledge graphs and user access footprint over complex compliance relationships.
- Built LLM-powered compliance automation (Python, n8n, AWS Bedrock, LangChain) for evidence collection, summarization, and control scoring, reducing manual auditor effort by 70%.
- Implemented RAG-style querying over historical compliance data using vector databases, allowing customers to ask natural-language questions and receive contextual answers.
- Developed full-stack React + GraphQL applications for compliance controls, identity graph visualization, and evidence management for enterprise users.

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built an automated identity lifecycle system syncing 500+ employees across UKG, JumpCloud, and Azure AD using Python and AWS serverless architecture, reducing provisioning time by 80%.
- Developed full-stack features (React, Python, Golang) for MLOps data labeling infrastructure, improving annotation throughput by 20% for ML training pipelines, performed monitoring and inference validation.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a cloud-based robotic lab automation platform used by 500+ scientists, utilizing React, Ruby on Rails, and Spring Boot.
- Designed and implemented features across 10+ core product modules, implemented database migrations to create and manage batch tables, ensuring schema consistency across environments
- Authored 100+ test cases and resolved critical production issues, integrated CI/CD pipelines to validate models, enforce quality checks, and promote artifacts in a regulated scientific platform

Skills

Languages: Python, Golang, JavaScript, TypeScript, C#, Java, Ruby, SQL, Bash
Frameworks: React, Node.js, FastAPI, ASP .NET Core, GraphQL, Spring Boot, Ruby on Rails, Gin
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD
Databases: PostgreSQL, MongoDB, Redis, Elasticsearch, Neo4j, Pinecone, MySQL
Tools & Methodologies: AI Automation, Generative AI, Agentic AI, LLMs, OpenAI APIs, Prompt Design, Structured Outputs, n8n, RAG Fundamentals, Vector Search, Celery, Kafka, LangSmith, OpenTelemetry, Graph Databases, AI Governance, Agile, REST APIs, Microservices, Git, Linux, TDD, SRE

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
