Professional Experience

Software Engineer *Jun 2025 – Present*

Epik Solutions | Enterprise Security Platform

- Built scalable **Python** and **Go** microservices integrating enterprise platform APIs, automating backend workflows for 500+ users and reducing mean time to resolution by 15 minutes across web services.
- Developed real-time **React** analytics dashboards consuming telemetry from 15+ backend systems, eliminating 20+ hours per week of manual reporting and improving stakeholder decision velocity.
- Built **Python**-based event processing pipelines with **Azure OpenAI** and **n8n**, processing 1,000+ daily user events with automated triage logic, reducing analyst workload by 30%.
- Automated enterprise user-facing workflows using **Python**, **Azure Functions**, and **Power Platform**, delivering self-service web capabilities to 500+ users and cutting operational cycle times by 40%.
- Deployed web services on **Azure** using **Docker**, **Kubernetes**, and **GitHub Actions** CI/CD, enforcing Terraform Sentinel infrastructure standards and improving pipeline success rates by 25%.
- Leveraged **GitHub Copilot** and **Cursor** to accelerate full-stack feature development, reducing coding time by 25% while maintaining code quality and test coverage across Agile sprints.
- Collaborated with Product, DevOps, and QA teams in Agile sprint ceremonies, delivering web features iteratively with peer code reviews and zero-downtime deployments.

Founding Engineer (Full Stack) *Jul 2023 – Jun 2025*

Samay Systems LLC | B2B SaaS Web Platform

- Architected a multi-tenant SaaS web platform serving **15+ enterprise clients**, **scaling to 10,000+ users per org** on **AWS**, ensuring tenant isolation, scalability, and 99.9% high availability.
- Designed distributed **Python** and **Golang** backend systems on **AWS** (Lambda, ECS, PostgreSQL, Neo4j) with strict tenant isolation across relational, graph, and object storage layers.
- Developed full-stack **React** and **GraphQL** web applications enabling compliance controls, evidence management, policy authoring, and document storage workflows for 10,000+ enterprise users.
- Built LLM-powered web features using **Python**, **LangChain**, and **AWS Bedrock** to automate content summarization and control scoring, reducing manual user effort by 70% platform-wide.
- Designed distributed **Python** data pipelines ingesting 5M+ daily identity events, building RESTful API features and graph-backed search that reduced unauthorized access footprints by 30%.
- Utilized **OpenAI API** and **LangChain** for personalized content generation features, enhancing user engagement by 25% through dynamic interactions across enterprise client deployments.
- Monitored system health using **Prometheus** and **Grafana**, iterated on features via **Jira** and **Confluence**, achieving 99.99% uptime and 15% improvement in feature adoption.
- Implemented **CI/CD pipelines** using **Jenkins** and **Terraform** to automate deployments on **AWS EC2**, accelerating feature releases by 40% and improving deployment reliability.

Software Engineer *Jul 2021 – Aug 2022*

ZeMoSo Technologies | Cloud-Native Product Development

- Delivered full-stack features for a cloud-based robotic lab web platform used by 500+ scientists, working across **React**, **Ruby on Rails**, **Java Spring Boot**, and **PostgreSQL** in a microservices architecture.
- Designed and implemented features across 10+ core product modules (inventory, compounds, batch tracking, LCMS uploads, container linkage), enabling accurate web-based tracking of complex experimental data.
- Developed and maintained **Java Spring Boot** backend APIs handling 10,000+ concurrent requests, designing RESTful endpoints that ensured data integrity and application stability at 98% uptime.
- Implemented robust data models in **PostgreSQL** and **MySQL**, optimizing database queries for complex reports and reducing generation time from 2 minutes to 15 seconds for end users.
- Authored 100+ test cases, resolved critical production bugs, and integrated **Jenkins** CI/CD pipelines to enforce quality standards in an **Agile** team on a regulated scientific platform.

Skills

Languages: Python, Java, Golang, TypeScript, JavaScript, HTML, CSS, SQL, Bash, C++
Frameworks & Tools: React, Node.js, GraphQL, Spring Boot, Ruby on Rails, Flask, Gin, Jenkins, Terraform, Docker, Kubernetes, n8n, Power Platform, GitHub Actions, Prometheus, Grafana
Cloud & Infra: AWS (Lambda, ECS, EC2, Bedrock, CDK), Azure (Functions, OpenAI, Kubernetes)
Databases & Search: PostgreSQL, MySQL, MongoDB, Redis, Neo4j, OpenSearch
AI & ML: LangChain, AWS Bedrock, Azure OpenAI, OpenCV, Pandas
Practices: Full-Stack Development, Microservices, RESTful APIs, CI/CD, Agile/Scrum, System Design, TDD

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
