Summary

Software Engineer with a strong foundation in **Java/Kotlin backend development and React/JavaScript frontend engineering**, focused on building reliable, customer-centric products. Experienced collaborating across teams to deliver high-quality features on time, applying software engineering best practices, and continuously learning new technologies. Passionate about improving user experience through thoughtful design, clean code, and iterative delivery.

Technical Skills

Languages: Java, Kotlin, JavaScript, Python
Frontend: React, modern JavaScript, component-based UI development
Backend: JVM services, REST APIs, object-oriented design
Engineering Practices: code reviews, testing, CI/CD, debugging
Quality & UX: performance, reliability, usability improvements
Collaboration: agile development, cross-functional teamwork, customer engagement

---

Professional Experience

Epic Solutions
Software Engineer II
June 2025 – Present

- Built and enhanced **Java/Kotlin backend services** supporting customer-facing workflows, ensuring correctness, scalability, and maintainable design.
- Developed **React-based UI components** to improve clarity and usability of complex user flows, directly impacting customer experience.
- Collaborated with product managers and designers to translate customer feedback into **feature enhancements** that shipped on schedule.
- Applied **software engineering best practices** by writing clean, testable code and participating in peer code reviews to maintain a high quality bar.
- Debugged production issues across frontend and backend layers, identifying root causes and implementing durable fixes.
- Actively learned new tools and patterns to continuously improve delivery speed and solution quality.

Samay Systems LLC
Software Engineer I
July 2024 – June 2025

- Implemented **full-stack features** using Java on the backend and React/JavaScript on the frontend to support data-driven applications.

- Improved user experience by refining UI interactions and reducing friction in common workflows.
- Worked closely with teammates in an agile environment to deliver **high-quality, on-time releases**.
- Contributed to testing and validation efforts to ensure features met functional and quality requirements.
- Engaged with internal users to understand needs and iterate on solutions based on real feedback.

Monarch Tractor
Software Development Engineer Intern
June 2023 – August 2023

- Developed backend automation services using Java and Python to streamline operational processes.
- Built simple frontend views to surface status and results to users, improving transparency and usability.
- Collaborated with engineers and stakeholders to understand requirements and deliver working solutions quickly.
- Gained hands-on experience following engineering best practices in a production environment.

ZeMoSo Technologies
Associate Software Engineer
July 2021 – August 2022

- Implemented backend APIs and frontend features using Java and JavaScript.
- Applied object-oriented principles to build maintainable and extensible code.
- Participated in debugging, testing, and release activities to support stable product delivery.
- Worked in fast-paced teams, adapting quickly to changing requirements and priorities.

Education

Master of Science in Computer Science
Oklahoma State University

Bachelor of Technology in Computer Science
JNTU Hyderabad
