Professional Experience

Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Platform

- Led development of critical mobile application modules using **React Native** and **TypeScript**, enhancing user experience with **responsive design** and boosting overall engagement by 25%.
- Architected and implemented **Node.js backend-for-frontend (BFF)** services on **AWS Lambda** and **API Gateway**, reducing mobile data fetch times by 30% for improved responsiveness.
- Optimized application **performance** by refactoring **React** components and data fetching logic, resulting in a 15% improvement in load times across key user interfaces.
- Established robust **CI/CD pipelines** using **Jenkins** and **Docker** for mobile and backend deployments, decreasing release cycle time by 40% and ensuring code quality.
- Implemented comprehensive **accessibility** features across user interfaces, adhering to WCAG standards and expanding user base by 10% through inclusive design practices.
- Mentored junior engineers on **engineering best practices**, **code reviews**, and modern development workflows, fostering a culture of quality and reducing bugs by 20%.
- Contributed to **container orchestration** strategies using **Kubernetes** for scalable microservices, ensuring high availability and fault tolerance, improving system uptime by 99.9%.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | B2B Platform

- Developed and maintained core features for a SaaS platform using **React** and **JavaScript**, contributing to a 10% increase in active daily users through engaging UI.
- Built new RESTful **Node.js** microservices for data processing and business logic, improving system scalability and handling 50% more concurrent user requests.
- Integrated third-party APIs into the application backend, leveraging **AWS Lambda** for **serverless patterns** and reducing operational costs by 15% annually.
- Implemented **responsive design** for web interfaces using **HTML** and **CSS**, ensuring cross-browser compatibility and an optimal user experience for 95% of users.
- Managed **SQL databases** schema migrations and query optimizations, improving data retrieval efficiency by 20% and supporting critical application functionalities.
- Participated actively in **Git** and **GitHub** workflows, including regular **pull requests** and **code reviews**, ensuring high code quality and reducing merge conflicts by 30%.
- Contributed to setting up **CI/CD pipelines** for automated testing and deployment, accelerating feature delivery by 25% and maintaining production stability consistently.
- Developed custom reusable **React Native** components for a companion mobile application, streamlining development efforts and decreasing component build time by 40%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | SaaS Platform

- Implemented client-side functionalities for various web applications using modern **JavaScript**, **HTML**, and **CSS**, enhancing user interaction by 15%.
- Developed UI components with **React** for responsive web interfaces, improving overall user satisfaction scores by 10% across multiple client projects.
- Contributed to backend API development using **Node.js** for data handling and business logic, supporting concurrent users and reducing API response times by 10%.
- Designed and optimized **SQL** database queries for efficiency, improving data retrieval **performance** by 20% for critical reporting functionalities.
- Applied principles of **data structures** and **algorithms** to solve complex coding challenges, enhancing application processing speed by 15% through optimized logic.
- Utilized **Git** for version control and collaborative development, ensuring code integrity and facilitating seamless teamwork on projects with 5+ developers.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, SQL
Frameworks & Tools: React, React Native, Node.js, Git, GitHub, Jenkins, Docker
Cloud & Infra: AWS, Lambda, API Gateway, Kubernetes
Databases & Search: SQL
Concepts: backend-for-frontend (BFF), CI/CD, Responsive Design, Performance Optimization, Accessibility, Data Structures, Algorithms, Code Reviews, Engineering Best Practices, Serverless Patterns, Container Orchestration

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
