Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Nagarro | Catalog Derivation Platform Engineering

- Led design and development of **Java Spring Boot** microservices architecture for product attribute derivation, handling 50M daily catalog updates with 99.9% uptime.
- Implemented **Kafka** real-time messaging pipelines for scalable data ingestion and catalog enrichment, reducing processing latency by 60% for enterprise clients.
- Optimized **BigQuery** and **NoSQL databases** (**DynamoDB**) for complex catalog data models, improving query performance by 45% for critical analytical reports.
- Integrated **GitHub Copilot** and agentic workflows into development lifecycle, boosting developer productivity by 20% and accelerating delivery timelines by 15%.
- Architected and deployed **CI/CD** pipelines on **AWS** for automated testing and deployment, achieving 90% faster release cycles and enhanced code quality by 25%.
- Mentored junior engineers on best practices for **Java backend development** and **Spring Boot** applications, fostering a culture of technical excellence and innovation.

Software Engineer *Jul 2022 – Jun 2025*

Endava | Real-time Data Processing & Microservices

- Developed robust **Java Spring Boot** services for real-time catalog data enrichment, processing over 10M events daily, enhancing data accuracy by 15%.
- Engineered **Kafka** consumers and producers for high-throughput messaging, ensuring reliable data flow across distributed systems, reducing message loss to 0.1%.
- Designed and implemented data storage solutions using **NoSQL databases** (**MongoDB**) for variant redesign, achieving sub-second data retrieval for critical operations.
- Wrote comprehensive **JUnit** unit and functional test cases for **Java backend development**, improving code quality and reducing post-deployment defects by 25%.
- Leveraged **BigQuery** for large-scale data analytics and reporting on product attributes, providing actionable insights that optimized merchandising strategies by 10%.
- Contributed to **CI/CD automation** initiatives, deploying scalable services to **GCP** environments, streamlining release processes and minimizing manual errors by 30%.
- Utilized **OpenAI API** for generating code snippets and improving documentation efficiency after Nov 2022, accelerating feature development cycles by 12%.
- Collaborated with cross-functional product and editorial teams to define and implement new catalog data models, enhancing product attribute derivation and improving data quality by 18%. This facilitated critical downstream applications.

Software Engineer *Jul 2020 – Aug 2022*

Persistent Systems | Enterprise Application Development

- Developed and maintained **Java Spring Boot REST API** endpoints for enterprise applications, supporting 50K daily user requests with high availability.
- Implemented data persistence layers using **JPA** with **PostgreSQL** to manage core business logic, ensuring data integrity and optimizing transaction speeds by 20%.
- Wrote thorough **JUnit** unit tests for **Java backend development**, achieving 85% code coverage and significantly enhancing the reliability of critical modules.
- Collaborated on designing and optimizing database schemas for performance, reducing query execution times by 30% for improved application responsiveness.
- Contributed to a modular codebase following best practices for code quality and maintainability, facilitating seamless integration of new features by 18%.
- Developed and deployed system enhancements for critical enterprise applications, improving overall platform stability and ensuring continuous service availability for key business operations by 15% through robust backend logic.

Skills

Languages: Java
Frameworks & Tools: Spring Boot, Kafka, JUnit, CI/CD, GitHub Copilot, OpenAI API, JPA, REST API
Cloud & Infra: AWS, GCP, Microservices Architecture, Distributed Systems, NoSQL Databases, BigQuery, PostgreSQL
Concepts: Unit Testing, Functional Testing, Code Quality, Scalability, Real-time Messaging, Product Attribute Derivation, Catalog Enrichment, Data Modeling, Variant Redesign
AI Tools: GitHub Copilot, Agentic Workflows, OpenAI API

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
