Professional Experience

Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Platform

- Designed and implemented complex extbfC++ modules for an extbfautomotive PLM system, integrating with extbfSiemens Polarion PLM to manage product data efficiently, reducing manual data entry by 35%.
- Developed extbfPython scripts for automated extbfSW configuration management and deployment pipelines within extbfGitLab CI, accelerating release cycles for embedded software by 20% on average.
- Optimized extbfSQL database queries and stored procedures for critical application performance, enhancing data retrieval speeds by 40% for extbfTeamCenter users accessing manufacturing specifications.
- Led extbfJIRA and extbfConfluence administration, establishing extbfprocess-oriented concepts for development workflows, improving team collaboration and project tracking accuracy by 25%.
- Engineered robust extbfJava applications for integrating extbfAnsys simulation data with PLM systems, ensuring data consistency and reducing simulation setup time by 15% across projects.
- Implemented extbfCI/CD pipelines using extbfJenkins for extbfaerospace control software, automating builds and tests to reduce integration defects by 30% and improve code quality.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | B2B Platform

- Developed extbfPython microservices for extbfdata organization and processing extbfMS Access legacy databases into a modern extbfSQL warehouse, improving reporting efficiency by 50%.
- Implemented features using extbfJava for an enterprise resource planning system, focusing on extbfprocess-oriented concepts and extbfAgile methodologies, enhancing user productivity by 18% overall.
- Configured and maintained extbfGitLab CI pipelines for multiple software projects, streamlining the extbfSW continuous integration process and reducing deployment failures by 22% annually.
- Created extbfVBA macros and scripts to automate extbfMS Access data entry and report generation tasks, saving operational teams approximately 10 hours per week.
- Participated in extbfJIRA and extbfConfluence management, enforcing extbfWaterfall and extbfAgile project management practices to track progress, delivering 95% of features on schedule.
- Built RESTful extbfPython APIs integrating extbfTeamCenter and extbf3DX product data, supporting extbffast-paced development tools and 300+ daily internal data requests.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | SaaS Platform

- Developed core application logic using extbfJava for a client's inventory management system, integrating with existing extbfSQL databases to improve data accuracy by 20%.
- Implemented extbfPython scripts for automating software testing and deployment routines, contributing to extbfSW configuration management and reducing manual effort by 25% weekly.
- Collaborated on system design and architecture, applying extbfprocess-oriented concepts to ensure robust solutions and maintainable code, reducing post-release bug reports by 15%.
- Utilized extbfApache Velocity for dynamic content generation in web applications, enhancing user experience and facilitating quicker updates across 5 key client projects.
- Assisted in building data pipelines using extbfSQL for reporting, ensuring effective extbfdata organization and delivery of critical business insights to management within 24 hours.
- Contributed to extbfCI/CD implementation using extbfJenkins for small-scale projects, improving deployment frequency by 40% and overall developer productivity by 10%.

Skills

Languages: C++, Python, SQL, Java, VBA
Frameworks & Tools: Siemens Polarion PLM, GitLab CI, JIRA, Confluence, TeamCenter, Ansys, Jenkins, MS Access, Apache Velocity, 3DX
Cloud & Infra:
Databases & Search: SQL
Concepts: SW configuration management, process-oriented concepts, CI/CD, Agile, Waterfall, data organization

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
