Venkata Sai

Software Engineer, Forward Deployed GenAI

venkatasai.jobs@gmail.com | +1(512)-848-0295 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

EPAM Systems | Enterprise GenAI Solution Development

- Designed and developed multi-agent **GenAI applications** using **LangGraph** and **CrewAI** to automate complex enterprise content workflows, improving task completion by 35%.
- Architected and deployed full-stack **GenAI solutions** with **React**, **Next.js**, and **Python** on **AWS EKS**, reducing time-to-market for prototypes by 40%.
- Led the development of **RAG pipelines** leveraging **Pinecone vector databases** and custom **embeddings** for **LLMs** like **GPT** and **Claude**, enhancing response accuracy by 28%.
- Implemented advanced **prompt engineering** techniques for various **LLMs** (e.g., **Llama**, **Mistral**) to optimize content generation and summarization, boosting output relevance by 30%.
- Collaborated with enterprise customers to gather requirements and co-build bespoke **GenAI applications**, translating complex needs into robust **production deployments**, achieving 95% customer satisfaction.
- Extracted reusable patterns into shared **Python** and **Node.js** libraries, improving development velocity for subsequent projects by 2x through standardized components.
- Automated **CI/CD pipelines** using **GitHub Actions** and **Terraform** for **GenAI application** deployments on **AWS**, decreasing deployment time by 60% and errors by 20%.

Software Engineer *Jul 2024 – Jun 2025*

Globant | AI-Enhanced Data Processing Platform

- Developed and optimized **Python** microservices for data ingestion and processing on **AWS Lambda**, handling over 10 million records daily with 99.9% uptime.
- Implemented **RAG pipelines** using **LlamaIndex** and **ChromaDB** to integrate enterprise knowledge bases with **OpenAI API LLMs**, improving internal data retrieval by 40%.
- Built **full-stack** features for a B2B SaaS platform using **React**, **Next.js**, and **Node.js**, enhancing user engagement by 25% through improved functionality.
- Designed and deployed scalable **REST APIs** with **Node.js** (**Express.js**) and **MongoDB** for a high-traffic analytics dashboard, supporting 50,000 concurrent users.
- Containerized applications using **Docker** and orchestrated deployments on **AWS EKS**, achieving 99.95% system availability and streamlining infrastructure management.
- Contributed to **CI/CD pipelines** with **GitLab CI** for automated testing and deployment, accelerating release cycles by 30% and maintaining code quality.
- Developed custom **embeddings** for specialized domain data, enhancing the accuracy of search and recommendation features within an internal knowledge management system by 20%.
- Collaborated with product teams to translate business requirements into technical specifications for new features, delivering 12 successful releases over three years.

Software Engineer *Jul 2020 – Aug 2022*

Nagarro | Digital Banking Platform Development

- Developed backend **Java** microservices using **Spring Boot** for a digital banking platform, processing 20,000 transactions per minute, enhancing system modularity.
- Implemented **REST APIs** for customer account management and payment processing, integrating with third-party financial services, improving data exchange efficiency by 30%.
- Designed and maintained **SQL** databases, primarily **PostgreSQL**, ensuring data integrity and optimizing query performance for critical financial data, reducing lookup times by 25%.
- Contributed to frontend development using **React** and **JavaScript** to create intuitive user interfaces for banking applications, enhancing user experience by 15%.
- Assisted in setting up **CI/CD pipelines** using **Jenkins** and **Maven** for automated builds and deployments, reducing manual effort by 40%.
- Developed unit and integration tests using **JUnit** and **pytest** to ensure code quality and system reliability across various microservices, decreasing production bugs by 18%.

Skills

Languages: Python, JavaScript, Java, SQL
Frameworks & Tools: LangGraph, CrewAI, GPT, Claude, Llama, Mistral, React, Next.js, Node.js, Express.js, Spring Boot, Docker, Kubernetes, GitHub Actions, GitLab CI, LlamaIndex, OpenAI API, pytest, Terraform, Jenkins, Maven
Cloud & Infra: AWS, AWS Lambda, AWS EKS, PostgreSQL, MongoDB, Redis, Pinecone, ChromaDB
Concepts: REST APIs, Microservices, System Design, Scalability, CI/CD, Agile Methodologies, Prompt Engineering, Full-stack Development, Multi-agent Systems, Production Deployment

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
