Neel Gali

Generative AI Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Generative AI Engineer *Jun 2025 - Present*

Epik Solutions

- Architected enterprise GenAI solutions on Azure OpenAI and AI Studio, building LLM-powered copilots that automated threat summarization and improved SOC security reporting relevance by 25%.
- Implemented RAG pipelines using Azure AI Search over enterprise security data sources, enabling natural language querying of audit logs with 91% grounding accuracy across findings.
- Built Python LLM orchestration layers using LangChain to generate structured security metrics dashboards from unstructured incident data, delivering enterprise risk insights with sub-2s latency.
- Designed GenAI REST APIs with responsible AI guardrails including PII redaction and content filtering, ensuring secure handling of sensitive security data per enterprise governance policies.
- Optimized Golang microservices for real-time security event ingestion and LLM inference routing, reducing end-to-end pipeline latency by 15% and supporting 10,000+ daily monitored enterprise events.

ML Engineer (AI/Search) *Jul 2024 - Jun 2025*

Samay Systems LLC

- Architected a multi-tenant RAG system for 15+ enterprise clients using Azure AI Search with vector embeddings, improving query relevance scores by 20% across all tenants.
- Implemented an LLM-powered compliance automation pipeline using Azure OpenAI and LangChain, summarizing and classifying 10K+ compliance documents and cutting manual auditor effort by 70%.
- Integrated GenAI solutions with Azure Data Lake and Synapse Analytics, enabling real-time enterprise knowledge base refresh and sustaining retrieval accuracy above 89% across live corpora.
- Built document intelligence APIs using Azure Form Recognizer with custom NLP post-processing, improving structured data extraction accuracy from 71% to 89% across 500K+ compliance artifacts.
- Drove responsible AI practices across 10+ production deployments, instrumenting model evaluation dashboards tracking faithfulness, relevance, and metrics with enterprise alerting on quality drift.

AI/ML Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Built Python data pipelines feeding agricultural data into cloud AI training jobs, applying prompt engineering for synthetic label generation and boosting annotation throughput by 20%.
- Deployed serverless Azure Functions pipelines for version-controlled dataset delivery, integrating Blob Storage to sustain continuous training across 3 production vision models with 40% fewer failures.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered full-stack features for a cloud-based scientific lab platform using React and Spring Boot REST APIs, ensuring accurate tracking of experimental data for 500+ scientists.
- Designed and integrated RESTful API contracts across 10+ product modules with Spring Boot and PostgreSQL, establishing reusable data validation patterns adopted as team-wide engineering standards.
- Authored 100+ automated test cases with JUnit and Jasmine, resolving critical production issues and improving system reliability and data integrity in a regulated scientific environment.

Skills

Programming Languages: Python, Golang, TypeScript, Java, C#, SQL, Bash
Generative AI & LLMs: Azure OpenAI, Azure AI Studio, LangChain, RAG, Prompt Engineering, Vector Search, Semantic Chunking, Document Intelligence, Responsible AI
Azure Data & AI Services: Azure (AI Search, Synapse Analytics, Data Lake, Form Recognizer, Functions)
ML Frameworks: TensorFlow, PyTorch, HuggingFace Transformers, Scikit-learn, AWS SageMaker
Cloud & DevOps: Azure, AWS, Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, Git
Frameworks & Databases: React, GraphQL, Spring Boot, PostgreSQL, MongoDB, Redis, Neo4j

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
