Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise Identity & Automation Platform

- Designed and implemented a scalable zero-touch device provisioning solution across **macOS**, **Windows**, and **Linux** using **Kandji** and **Terraform**, automating setup for 300+ new hires monthly.
- Led the integration of acquired company systems, performing **Okta** identity federation, **Google Workspace** tenant consolidation, and **Slack Enterprise Grid** migration for 200+ users, completing it 2 weeks early.
- Engineered automated onboarding/offboarding workflows leveraging **SCIM** and **REST APIs** to provision access across 50+ **SaaS applications**, reducing manual effort by 90% and improving security posture.
- Developed custom **Python** scripts and **Ansible** playbooks to automate enterprise **SaaS platform** administration tasks, reducing support tickets by 35% and improving operational efficiency.
- Architected and deployed **Zero-Trust Network Access** policies using **Cloudflare Access** and **AWS** for critical internal applications, strengthening security posture and enabling secure remote work for 400 employees.
- Implemented comprehensive monitoring and alerting for identity and access anomalies across the entire **SaaS ecosystem** using **Splunk**, detecting and mitigating 15+ potential security incidents quarterly.
- Modernized **CI/CD pipelines** using **GitLab CI** for infrastructure as code deployments, enabling automated testing and rapid, secure updates to core **IT systems** with 99.9% reliability.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Cloud SaaS & Automation Solutions

- Managed and secured enterprise **SaaS platforms** like **Okta**, **Google Workspace**, and **Zoom**, ensuring 99.9% uptime and compliance with internal security policies for 500+ users.
- Configured and maintained **SAML**, **OAuth**, and **SCIM** integrations for critical business applications, standardizing authentication and identity management across 30+ services seamlessly.
- Developed and maintained **Python** and **Bash** scripts for routine system administration and automation tasks, reducing manual configuration time by 60% across various server environments.
- Administered **MDM platforms** (e.g., **Jamf**) to manage a mixed-platform fleet including **macOS** and **Windows** devices, ensuring secure configurations and compliance for 400+ endpoints.
- Implemented **Infrastructure as Code** practices using **Terraform** for provisioning **AWS** resources, achieving consistent environments and reducing deployment errors by 40% across projects.
- Contributed to designing **Zero-Trust** security architectures, implementing granular access controls and network segmentation strategies that reduced internal threat surface by 20%.
- Developed custom monitoring solutions using **Prometheus** and **Grafana** for critical **IT infrastructure**, proactively identifying and resolving issues, improving system reliability by 15%.
- Collaborated with security teams to implement **defense in depth** strategies, enhancing endpoint protection and data loss prevention across all corporate devices, reducing security incidents by 10%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Enterprise Software Development

- Developed and maintained backend services using **Java** and **Spring Boot**, supporting a core enterprise application utilized by 10,000+ daily active users with 99.9% uptime.
- Designed and implemented **RESTful APIs** for data integration with third-party systems, improving data exchange efficiency by 30% and enabling new feature development rapidly.
- Wrote comprehensive unit and integration tests for new features using **JUnit** and **Mockito**, increasing code coverage to 85% and significantly reducing post-release bugs by 20%.
- Utilized **SQL** to manage and optimize **PostgreSQL** databases, improving query performance by 25% and ensuring data integrity for critical business operations.
- Automated deployment scripts using **Shell Scripting** and **Jenkins** for application releases, reducing deployment time from 2 hours to 15 minutes, enhancing development velocity.
- Collaborated with cross-functional teams using **Agile** methodologies to deliver software solutions, ensuring projects were completed on time and met client requirements with 95% satisfaction.

Skills

Frameworks & Tools: Kandji, Terraform, Okta, Google Workspace, Slack, SCIM, REST APIs, Ansible, Cloudflare Access, Splunk, React, GitLab CI, Jamf, SAML, OAuth, Prometheus, Grafana, Spring Boot, JUnit, Mockito, Jenkins
Concepts: Identity & Access Management (IAM), Automation, Zero-Trust Architecture, Defense-in-Depth, DevOps, M&A Integration, Compliance Frameworks, Security Auditing, Device Provisioning, SaaS Platform Administration
Cloud & Infra: AWS, Cloud Platforms, Network Security, PostgreSQL
Languages: Python, Bash, Java, Shell Scripting

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
