Professional Experience

Software Engineer (Frontend Focused) *Jun 2025 - Present*

Epik Solutions

- Engineered responsive React user interfaces with HTML/CSS, integrating RESTful APIs to enhance system monitoring for security teams, boosting efficiency by 25%.
- Developed interactive frontend applications using JavaScript and React, creating dynamic dashboards that streamlined data visualization for C-suite, reducing reporting by 20%.
- Implemented robust testing frameworks and writing integration tests for React components, improving application stability and ensuring 99.9% uptime for critical workflows.
- Collaborated using Git version control systems to deploy modular JavaScript components across enterprise frontend applications, speeding feature delivery by 15% for 500+ users.
- Optimized React application performance and user experience using advanced HTML and CSS techniques, reducing load times by 30% and improving user engagement.

Founding Software Engineer *Jul 2024 - Jun 2025*

Samay Systems LLC

- Led frontend development for a multi-tenant SaaS platform, architecting React components and integrating RESTful APIs for 15+ enterprise clients, achieving 99% uptime.
- Designed and built scalable React + GraphQL applications, using HTML and CSS to visualize compliance data, enhancing user comprehension for 10,000+ users.
- Implemented comprehensive testing frameworks for JavaScript-based frontend applications, including writing integration tests, reducing bug reports by 40% and improving release confidence.
- Collaborated on full-stack feature development using React and RESTful APIs, applying Git version control systems to streamline workflows for complex compliance control management.
- Mentored junior developers in best practices for JavaScript, React, and frontend development, fostering a high-performance team environment and improving code quality by 20%.

SDE Intern *Jun 2023 - Aug 2023*

Monarch Tractor

- Contributed to frontend development of MLOps data labeling tools, building React components with clean HTML and CSS, boosting annotation throughput by 20%.
- Developed features in React and JavaScript, integrating RESTful APIs for data synchronization across systems, improving data consistency and reducing manual effort by 15%.

Software Engineer *Jul 2021 - Aug 2022*

ZeMoSo Technologies

- Delivered frontend development for a robotic lab platform, crafting React interfaces with responsive HTML and CSS for 500+ scientists, enhancing user experience.
- Implemented core frontend application modules using JavaScript and React, integrating RESTful APIs to display complex experimental data, improving accuracy by 10%.
- Authored 100+ integration tests for React components using testing frameworks, resolving critical production issues and ensuring 99.9% data integrity in a regulated platform.

Skills

Languages: JavaScript, TypeScript, Python, Golang, SQL, C#
Frameworks: React, Node.js, GraphQL, Spring Boot, Ruby on Rails
Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD
Databases: PostgreSQL, MongoDB, Redis, MySQL
Tools & Methodologies: Git, HTML, CSS, RESTful APIs, Testing Frameworks, Agile, Microservices, TDD, Linux

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
