Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Fintech Banking Platform for Startups

- Designed and implemented a high-performance payment processing service using **Java** and **Spring Boot**, integrating with multiple banking APIs to support startup transactions, reducing processing latency by 30%.
- Led the migration of key UI components to **React** and **TypeScript**, improving the banking platform's user experience and reducing front-end bug reports by 25% for startup clients.
- Championed the development of a real-time fraud detection system utilizing **Apache Kafka** and **AWS Kinesis**, directly supporting product-minded goals to safeguard customer assets by 99.9%.
- Engineered a microservices architecture for new financial products using **Go** and **Docker**, ensuring scalability and resilience for an increasing number of startup customers.
- Developed and maintained robust **Python** ETL pipelines on **AWS Glue** to ingest and transform financial data from legacy industry tools, improving data availability by 40%.
- Optimized **PostgreSQL** database queries and indexing for a core ledger system, significantly reducing API response times by 20% and enhancing overall banking performance.
- Implemented **Kubernetes** deployments via **GitLab CI/CD** for critical backend services, streamlining releases and reducing deployment failures by 15% across the platform.

Software Engineer *Jul 2023 – Jun 2025*

Samay Systems LLC | Enterprise Financial Services Platform

- Built secure **REST APIs** using **Node.js** and **Express.js** for a financial transaction portal, enhancing data exchange speed by 35% for enterprise users.
- Collaborated on delivering new features for a customer-facing dashboard using **React** and **Redux**, improving user engagement with the banking platform by 18%.
- Deployed and managed core application components on **AWS EC2** and **S3**, ensuring high availability and resilience for critical financial services, achieving 99.9% uptime.
- Designed and implemented data models in **MongoDB** for a transaction history service, accommodating varied financial data structures and improving query efficiency by 25%.
- Integrated **OAuth 2.0** and **JWT** for secure authentication across microservices, protecting sensitive financial data and complying with industry security standards by 100%.
- Conducted performance profiling and optimizations on backend services, reducing average API response times from 500ms to 200ms for a better user experience.
- Developed comprehensive unit and integration tests using **Jest** and **Mocha** for backend services, increasing code coverage to 90% and reducing post-release bugs by 15%.
- Configured **Prometheus** and **Grafana** for real-time monitoring of application health and performance metrics, enabling proactive issue resolution within 5 minutes.

Software Engineer *Jul 2021 – Aug 2022*

Zemoso Technologies | B2B SaaS Workflow Automation Platform

- Developed and maintained core features of a B2B SaaS platform using **Python** and **Django**, delivering enhancements that improved client workflow efficiency by 20% for enterprise customers.
- Implemented user authentication and authorization modules with **Flask** and **SQLAlchemy**, ensuring data security and role-based access control (**RBAC**) across the platform, achieving 100% compliance.
- Designed and optimized relational database schemas in **MySQL** for various application modules, improving data retrieval speeds by 15% and supporting new product features.
- Contributed to front-end development using **JavaScript** and **jQuery** for interactive dashboards, enhancing user interface responsiveness and satisfaction by 10% for business users.
- Created and managed reproducible development environments using **Vagrant** and **Ansible**, standardizing setups for new engineers and reducing onboarding time by 25 hours.
- Wrote comprehensive documentation for API endpoints and system architecture, fostering knowledge sharing among team members and reducing support requests by 10% monthly.

Skills

Languages: Python, Java, Go, TypeScript, JavaScript, Haskell
Frameworks & Tools: Spring Boot, React, Redux, Apache Kafka, Docker, Kubernetes, GitLab CI/CD, Node.js, Express.js, Jest, Mocha, Prometheus, Grafana, Django, Flask, SQLAlchemy, jQuery, Vagrant, Ansible
Cloud & Infra: AWS Kinesis, AWS Glue, AWS EC2, AWS S3, PostgreSQL, MongoDB, MySQL
Concepts: Microservices, Scalability, REST APIs, CI/CD, OAuth 2.0, JWT, RBAC, ETL, System Design, Product Ownership, Performance Optimization, Monitoring, User Experience, Data Modeling, Unit Testing, Integration Testing

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
