Lohit Gali

Automation Engineer
lohitgali@gmail.com | +1(475)-291-1455

Summary

- Experienced **Automation Engineer** with 5+ years of hands-on expertise in **scripting, automation workflows, and systems integration** across cloud and hybrid environments.
- hands-on experience designing **LLM-powered agents, AI-assisted analysis workflows**, data processing, and security controls across **AWS, Azure, and enterprise environments**.
- Proficient in building **workflow automations using Power Automate** and n8n to streamline repetitive business operations and improve process efficiency.
- Skilled in integrating APIs, managing IAM policies, and designing visual monitoring and reporting systems using Power BI, enabling data-driven decision-making.
- Proven track record in supporting compliance and security initiatives through custom automations, real-time dashboards, and cloud-native tools like Lambda, Step Functions, and EventBridge.

Skills

AI & Agentic Systems: LLMs (OpenAI, Anthropic), Frameworks (LangChain, LlamaIndex, Hugging Face, BedRock), Prompt Engineering, Tool-Calling Agents, RAG, Vector Search
Scripting & Automation: PowerShell, Python, Bash, Power Automate, VBScript, VisualCV
Workflow Orchestration & RPA: Power Automate, n8n, AWS Step Functions, EventBridge
Data Visualization & Reporting: Power BI, Tableau, Grafana
Cloud Platforms & Services: AWS (Lambda, S3, EC2, IAM), Azure (AD, Logic Apps), GCP (Cloud Functions)
CI/CD & DevOps Tools: Jenkins, GitHub Actions, Azure DevOps, Docker, Kubernetes, Terraform
Databases & Data Management: SQL (MySQL, PostgreSQL), NoSQL (MongoDB, DynamoDB)
Testing & Monitoring: Selenium, Postman, Splunk, Nagios, Prometheus
Operating Systems: Windows Server, Linux (Ubuntu, CentOS), macOS
Security & Compliance: IAM (AWS IAM, Azure AD), OAuth 2.0, JWT, SSO Integration

Professional Experience

CIFC Asset Management *Jun 2025 – Present*
Senior Automation Engineer (Enterprise Security & Reporting)
Project: CIFC Enterprise Automation & KPI Reporting Modernization

- Designed LLM-backed AI agents that translate natural-language questions into automated analysis and summaries across Defender, Darktrace, and enterprise security tools.
- Developed advanced n8n workflows for API-based integrations, orchestrating data pipelines to aggregate and normalize metrics from multiple systems into Dataverse and Azure storage.
- Designed and implemented AI agent-orchestrated API pipelines using n8n, Fabric Dataflows Gen2, Lakehouse, and Semantic Models, enabling centralized, long-term retention and analytics of security and compliance data beyond native source limits.
- Delivered KPI dashboards and metrics tracking using Power BI, aligning business intelligence with compliance/security needs and enabling leadership to monitor trends across Defender, Darktrace and other security suites.
- Built Power Automate flows and Power Apps solutions with Dataverse as the backend, automating routine processes and enhancing end-user efficiency.

- Designed and automated SSRS reports integrated with Dynamics 365 (D365) to streamline operational reporting, ensuring accuracy and faster delivery of financial and business insights.

Samay Systems LLC *Feb 2025 – Jun 2025*
Senior Automation Engineer (Cloud & Compliance)
Project: Compliance Platform (SaaS) – Security & Compliance Automation

- Built AI-assisted compliance workflows combining LLM reasoning with structured cloud data to guide customers through audits, investigations, and risk analysis.
- Developed Python-based automation services that collect, validate, and summarize evidence from AWS, Azure, GitHub, and Jira via secure APIs.
- Implemented RAG-style querying over historical compliance data, allowing customers to ask natural-language questions and receive contextual answers.
- Created automated insight delivery pipelines that continuously refresh compliance KPIs and reports, eliminating manual prep cycles.
- Worked directly with customers to onboard integrations and tailor automation to real operational pain points.

Arvam Tech *Jul 2023 – Jan 2025*
Enterprise Automation Engineer
Project: Enterprise Asset Management System

- Built PowerShell scripts to automate CMDB updates and validate asset configs using JSON schema.
- Developed n8n workflows to sync asset inventory and process webhook-driven events.
- Integrated Power BI dashboards with gateway refresh for asset tracking and usage metrics.
- Used Power Automate to route asset approvals and escalate issues via Teams and SharePoint.
- Configured Jenkins jobs with Groovy and shell scripts to enforce tagging compliance.

RHYM Tech *Aug 2022 – May 2023*
Associate solutions Engineer
Project: Cybersecurity Threat Intelligence Platform

- Created PowerShell scripts for threat detection using Windows Event Logs and Linux syslogs.
- Built Python pipelines to ingest Splunk and Kafka data into MongoDB.
- Developed Power BI dashboards using custom connectors for threat trend visualization.
- Integrated n8n to auto-create Jira tickets, tag CVEs, and alert via Slack.
- Managed conditional access and credential rotation using Azure AD Graph API.

ZeMoSo Technologies *Jul 2021 – Aug 2022*
Associate Developer
Project: Biotech LabOps Automation

- Automated lab workflows using PowerShell, REST APIs, and CSV processors.
- Integrated OAuth2-secured APIs for RBAC control in lab pipelines.
- Built Power Automate flows for experiment approvals and lab availability checks.
- Designed Power BI dashboards with Power Query to visualize experiment KPIs.
- Created reusable n8n workflows for task orchestration and CRM syncing.

Projects

CIFC Platform
Problem: Security teams relied on manual reporting and ad-hoc investigations across fragmented tools.
Solution: Built AI-driven automation and self-updating dashboards using LLM agents, APIs, and Fabric to deliver continuous insights at scale.
Agent-based Compliance Dashboard – RHYM Tech

Problem: Audit preparation and evidence validation were time-consuming and error-prone for customers.
Solution: Implemented LLM-assisted compliance workflows and RAG-based querying to automate evidence collection and analysis.
Enterprise Asset Management Automation – Arvam Tech
Problem: Manual asset tracking was inefficient.
Solution: Automated data flows with PowerShell + Express.js, integrated Power BI, and used Power Automate for approval chains.

Education

Master's in Computer Science, Oklahoma State University, Stillwater, OK *May 2024*
Bachelor's in Computer Science, JNTU Hyderabad, India *Jun 2021*
