Venkata Sai

Falcon Complete Security Advisor

venkatasai.jobs@gmail.com | +1(512)-848-0295 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Nagarro | Enterprise Cybersecurity Solutions & Compliance

- Developed automated **Python** scripts for proactive **cybersecurity** posture assessments against **NIST CSF** standards, improving client compliance verification by 30% annually.
- Engineered **SIEM** integrations with **Splunk** and **Elastic Stack** for enhanced **threat detection** and **audit logging** capabilities, reducing incident investigation time by 15%.
- Led migration of **Windows** and **Linux** security configurations to **Infrastructure as Code** using **Terraform**, standardizing deployments across 500+ endpoints.
- Implemented **MDR/XDR** data pipelines on **Azure Data Lake** for real-time **incident response** analytics, accelerating breach containment by 25% on average.
- Developed **compliance reporting** module using **Python** and **Power BI** to generate **service reports** aligning with **PCI DSS** and **ISO 27001** for 100+ clients.
- Automated **vulnerability scanning** and **patch management** scripts for **MAC** environments using **Ansible**, reducing critical exposure windows by 50% for enterprise clients.
- Integrated **MITRE ATT&CK** framework into internal security tooling via **REST APIs**, enhancing **threat intelligence** and correlation for 75+ active threats daily.

Software Engineer *Jul 2022 – Jun 2025*

Persistent Systems | Security Data Platform & Operations

- Developed **Java** microservices for a **threat detection** rules engine, integrating **Kafka** for real-time event processing across diverse security logs, improving alert accuracy by 20%.
- Built **data pipelines** on **AWS S3** and **Glue** to aggregate **audit logging** data from various **Windows** and **Linux** servers, enabling 100% data availability.
- Designed and deployed **containerized** security tools using **Docker** and **Kubernetes** on **AWS EKS** to support scalable **incident response** capabilities across 15 investigations.
- Contributed to **Change Management** system development using **Node.js** and **PostgreSQL** for tracking security policy modifications, ensuring 99% configuration integrity.
- Automated **security posture** assessments for cloud environments using **AWS Security Hub**, generating daily compliance reports for 50+ enterprise accounts.
- Engineered **monitoring controls** using **Prometheus** and **Grafana** for critical **cybersecurity** infrastructure, detecting anomalies 10 minutes faster than before.
- Developed scripts in **Bash** and **Python** for automated **remediation** of common security misconfigurations on **Linux** systems, reducing manual effort by 35%.

Software Engineer *Jul 2020 – Aug 2022*

Endava | Secure Application Development & Infrastructure

- Developed **Python** scripts for automated **security patching** and configuration management on **Linux** servers, reducing manual updates by 60% across the fleet.
- Built secure **Java** applications following **OWASP Top 10** guidelines, implementing **input validation** and **encryption** to protect sensitive customer data by 99%.
- Contributed to the design of **API Gateway** with **JWT** authentication for secure service communication, processing 5M daily requests with 100ms latency.
- Implemented **logging and monitoring** solutions using **ELK Stack** for application performance and **cybersecurity** events, improving issue detection by 20%.
- Configured **firewall rules** and **network security groups** on **AWS VPC** to isolate critical systems, enhancing network segmentation by 50% for heightened security.
- Developed **SQL** queries and stored procedures for **PostgreSQL** database, ensuring data integrity and access control for 1TB of critical operational data.

Skills

Languages: Python, Java, Node.js, Bash, SQL
Frameworks & Tools: AWS Lambda, AWS S3, AWS Glue, AWS EKS, AWS Security Hub, Azure Data Lake, Terraform, Ansible, Splunk, Elastic Stack, Kafka, Spring Security, Power BI, Docker, Kubernetes, Prometheus, Grafana, OWASP
Cloud & Infra: AWS, Azure, AWS VPC, PostgreSQL, Elastic Stack
Concepts: Cybersecurity, Threat Detection, Incident Response, Security Posture, SIEM, MDR/XDR, ISO 27001, NIST CSF, PCI DSS, MITRE ATT&CK, Change Management, Audit & Monitoring, Customer Management, Remediation, REST APIs, OAuth2, RBAC, Microservices, Containerization, Infrastructure as Code, Network Security, Input Validation, Encryption

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
