Neel Gali

neellohit69@gmail.com

Skills

Languages: Python, C#, C++, Ruby, Java, JavaScript, SQL
Frameworks: React, Ruby on Rails, SpringBoot
Cloud: AWS, GCP, Azure
Tools: Unity, Docker, Kubernetes, Jenkins, Terraform, Postman, Git, Jira
Methodologies and Practices: Agile, SDLC, MVC, REST, Maven, TDD, UML

Experience

Software Developer Intern, Monarch Tractor – Livermore, CA Jun 2023 – Aug 2023

- Built an employee lifecycle management workflow that reduces manual workload through automation and scripting as an independent intern
- Streamlined data exchange across APIs for user management, device provisioning, user group administration, licensing, cron job execution using Python scripts and serverless AWS services
- Monitored and optimized the performance of CI/CD tools and pipelines, ensuring efficient and reliable software delivery

Full Stack Developer, ZeMoSo Technologies – Hyderabad, India Aug 2021 – Aug 2022

- Created UI components, refactored microservices, and built test cases for a scientific experiment tracking platform in a service-based startup, working with cross functional teams in React and Ruby on Rails
- Improved user interface elements, driving a 10% improvement in design consistency by integrating new UI components into the custom library and replacing subsequent legacy implementations
- Developed and integrated new features for user roles and permissions management
- Resolved issues with non-persisting data in edit forms, reducing error reports by 5% by ensuring backend updates, maintaining UI consistency, and adding tests
- Conducted unit tests to validate individual components and integration tests to verify the interoperability of different system modules

Projects

Virtual Incubation Centre VIC Github

- Developed a platform for entrepreneurs, mentors, and investors, enabling project registration, mentorship requests, and investment opportunities using Spring Boot, Spring MVC, and Spring Data JPA
- Built personalized user dashboards for managing project progress, mentorship feedback, and investment interactions for seamless user experience and efficient admin managements

Rails Alpha Blog Rails Alpha Blog Github

- Created a blogging platform allowing users to create, edit, and manage blog posts, utilizing Ruby on Rails and following MVC architecture
- Implemented user authentication, a robust routing system to handle various URL mappings and actions and active record for database management

Related Coursework

Explainable AI – MS in Computer Science at Oklahoma State Jan 2023

- Completed coursework in Explainable AI, mastering techniques like LIME and SHAP for model interpretability and exploring advanced topics like uncertainty estimation and causal inference in GNNs

Video game development – MS in Computer Science at Oklahoma State Aug 2024

- Completed coursework covering key concepts like scripting, physics, animation, and UI design, culminating in developing a comprehensive 3D space shooter game with level Design and enemy AI

Education

Oklahoma State University – MS in Computer Science May 2024
Jawaharlal Nehru Technological University Hyderabad – BS in Computer Science Jul 2021
