Neel Gali

Senior AI/ML Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Summary

Senior AI/ML Engineer with 5+ years progressing from **ML model development** and **NLP pipelines** into production **Agentic AI** and **LLM-powered systems**, building on **PyTorch**, **HuggingFace**, **LangGraph**, **OpenAI**, and **AWS** to deliver intelligent automation for 10,000+ enterprise users across compliance, security, and scientific domains.

Professional Experience

Senior AI Engineer *Jul 2025 - Present*

Epik Solutions | Enterprise Security AI

- Architected autonomous **AI agents** using **LangGraph** and **LangChain** over enterprise security data, orchestrating multi-step tool-use workflows that reduced manual security triage time by 40% across the platform.
- Engineered **multi-agent orchestration** systems with **CrewAI** and **LangGraph**, designing supervisor-agent hierarchies with dynamic routing that improved complex task completion accuracy by 32% over baselines.
- Built production **RAG pipelines** using **Pinecone** and **OpenSearch** vector databases with hybrid semantic search, improving AI response accuracy by 38% over baseline LLM retrieval for 10,000+ daily enterprise queries.
- Integrated **OpenAI GPT-4o** and **Anthropic Claude** APIs into secured REST endpoints with structured output parsing and **prompt engineering** best practices, achieving sub-2s AI response latency under production load.
- Deployed **agentic AI** services on **AWS** (Lambda, ECS, S3) with **Docker** and **Kubernetes**, implementing **GitHub Actions** CI/CD pipelines that cut AI feature release cycles from two weeks to three days.
- Led **Agile** sprint planning and LLM feature reviews across a 6-engineer AI team, consistently shipping 4+ agentic AI capabilities per sprint with zero critical regressions across 4 consecutive production releases.

AI/ML Engineer *Jul 2022 - Jun 2025*

Samay Systems LLC | B2B SaaS Compliance

- Trained and deployed **HuggingFace** fine-tuned **BERT**/T5 models for enterprise compliance document classification and information extraction, processing 10K+ documents monthly and reducing manual auditor effort by 70%.
- Built **Apache Kafka** event-driven pipelines to stream real-time compliance documents into ML model inference workers, decoupling 6+ microservices, improving throughput by 50% across 15+ enterprise clients.
- Integrated **OpenAI GPT-4** APIs in 2023 for unstructured compliance text summarization and Q&A, applying structured output prompting that reduced post-processing errors by 45% over rule-based extraction baselines.
- Built **RAG** pipelines with **Azure AI Search** vector databases in 2023–2024, pairing embedding-based retrieval with LLM generation to deliver context-aware compliance intelligence reports at 89% retrieval precision.
- Adopted **LangChain** and **LangGraph** in 2024 to orchestrate stateful multi-step compliance agent workflows, enabling parallel document processing and reducing end-to-end pipeline time by 35% at production scale.
- Provisioned ML and AI infrastructure on **AWS** (SageMaker, ECS, Lambda, S3) with **Terraform** IaC, enforcing **CI/CD** best practices for model versioning and reducing deployment errors by 40% across all tenants.
- Surfaced ML and AI outputs via **React.js** front-ends with real-time streaming responses, improving enterprise user task completion rates by 30% and reducing support escalations across 10,000+ production users.

Associate ML Engineer *Jul 2020 - Aug 2022*

Zemoso Technologies | LabOps Platform

- Trained **PyTorch** classification and regression models on scientific experiment datasets, building end-to-end **scikit-learn** feature engineering pipelines that reduced model training cycle time by 30% across LabOps modules.
- Fine-tuned **HuggingFace BERT**-based NLP models for domain-specific document classification and named entity extraction over lab reports, achieving 85%+ accuracy and replacing manual data entry for 500+ scientists.
- Built **AWS Lambda** and **S3**-triggered data ingestion pipelines for automated ML training dataset refresh, reducing manual data prep effort by 40% and ensuring model freshness across 3 production CV systems.
- Delivered full-stack experiment tracking features integrating **React.js** front-ends with **Spring Boot** REST APIs and **PostgreSQL**, providing accurate data management across 10+ regulated scientific workflows.
- Authored 100+ **pytest** automated test cases for ML data pipelines and model services, resolving critical production defects via systematic debugging and reducing regression incidents by 35% across LabOps modules.

Skills

Programming Languages: Python, JavaScript, TypeScript, Java, SQL, Bash
Agentic AI & LLMs: LangChain, LangGraph, CrewAI, OpenAI API (GPT-4o), Anthropic Claude, Azure OpenAI
ML & NLP: PyTorch, scikit-learn, HuggingFace Transformers, BERT, T5, Model Fine-tuning, Feature Engineering
Vector Databases & Search: Pinecone, OpenSearch, Azure AI Search, pgvector, Semantic Search, Embedding Models
Cloud & DevOps: AWS (SageMaker, Lambda, ECS, S3, EC2), Azure, Docker, Kubernetes, Terraform, GitHub Actions
Frameworks & Databases: React.js, Spring Boot, FastAPI, Node.js, PostgreSQL, MongoDB, Redis, Apache Kafka
Tools & Methodologies: Git, JIRA, Agile/Scrum, RESTful API Design, Microservices Architecture, OAuth2/JWT

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
