Lohit Gali

lohitgali@gmail.com

Summary

Computer Science Engineer with overall 5+ years experience in **Quality assurance** , full-stack development, DevOps and Cloud working across multiple startups. Skilled in **Python**, **SQL**, **Java**, **Selenium**, **Azure DevOps**, and **PowerBI**, Adept at building scalable web applications, and high performance software solutions

Skills

Programming Languages: **Java**, Ruby, **Python**, C++, SQL
Testing & QA Tools: **Selenium, Postman, JUnit, TestNG, Cypress, JIRA**
Tools and Methodologies: **Azure DevOps**, Jira, Agile, Scrum, Kanban, **PowerBI**, Docker, Kubernetes, Jenkins, Github Actions, Git, Jira, GitHub, Selenium, Postman, Maven, TDD, SDLC,
Operating Systems: Linux, Unix, Windows, macOS
Databases: **MySQL, MongoDB,** PostgreSQL, Oracle
Web Technologies: HTML, CSS, JavaScript, React, jQuery
Cloud Technologies: AWS (S3, EC2, RDS, Lambda, Redshift, EKS, ECS, CloudWatch), Azure AD

Education

Sponsorship not required
Master's in Computer Science, Oklahoma State University - Stillwater, OK May 2024
Bachelor's in Computer Science, Jawaharlal Nehru Technological University - Hyderabad, India June 2021

Experience

QA Engineer, Arvam Tech – CA Jul 2023 – present

- Led testing efforts for enterprise asset management (EAM) solutions, ensuring system reliability and performance.
- Developed and executed test strategies, including **automated and manual testing**, for frontend and backend services.
- Designed **Selenium-based automation scripts** to streamline functional and regression testing.
- Collaborated with developers and business analysts to define test cases and ensure full test coverage.
- Utilized **Azure DevOps** to manage test plans, execute test cases, and track defects.

Software Engineer, RHYM Tech – Remote, Stillwater, OK Aug 2022 – May 2023

- Conducted **software testing, including unit, integration, and performance testing**, to improve cybersecurity tools.
- Built automated test scripts using **Cypress** for frontend testing and **JUnit** for backend validation.
- Developed CI/CD pipelines with Jenkins to automate testing and deployment workflows.
- Integrated **Power BI dashboards** to monitor application performance and security metrics.
- Delivered custom web applications and solutions tailored to the unique needs of cybersecurity systems, enhancing the performance and scalability of key tools
- Built secure, **responsive web applications** using **React** and **Node.js**, leveraging **JWT for secure authentication** and OAuth for third-party integration
- Contributed to designing and implementing **real-time data analytics** systems with **Kafka and Splunk** for monitoring network traffic and detecting anomalies
- Enhanced system security by developing **web-based dashboards** for **intrusion detection and security event management**, providing users with visual insights into potential vulnerabilities
- Collaborated with a cross-functional team to integrate **threat detection algorithms** and APIs into existing systems, supporting **penetration testing and vulnerability assessments**

Full stack developer, ZeMoSo Technologies – Hyderabad, India Jul 2021 – Aug 2022

- Implemented robust test strategies for a biotech AI robotic lab platform, enhancing security and user experience.
- Designed **test automation frameworks** for RESTful APIs using **Postman and JUnit**.

- Led defect triage sessions and provided root cause analysis for identified issues.
- Optimized database performance using PostgreSQL queries and indexing strategies.

Software developer, RHYM Tech – Hyderabad, India Jun 2020 – May 2021

- Developed and tested cybersecurity solutions, ensuring compliance with security best practices.
- Performed **penetration testing** and vulnerability assessments to detect and address security flaws.
- Automated functional and regression testing using **Selenium WebDriver and Python scripts**.

Projects

Test Automation Framework for EAM Solutions | Arvam Tech

- **Problem**: The enterprise asset management system required a robust and scalable test automation framework to improve efficiency and reduce manual testing efforts
  Solution: Developed a comprehensive test automation suite using **Selenium and Cypress**, reducing test execution time by 40%. Enhanced defect tracking and reporting through **Azure DevOps dashboards**

Cybersecurity Intrusion Detection System | RHYM Tech

- **Problem**: The existing intrusion detection system lacked automated testing, making it difficult to validate security responses effectively
  Solution: Implemented test plans to validate system performance against security threats. Automated test cases to simulate cyberattacks and measure detection efficiency, improving system reliability

Strateos Platform API Testing | ZeMoSo Technologies

- **Problem**: The platform required comprehensive API testing to ensure seamless interaction between microservices and maintain system integrity
  Solution: Designed automated API test scripts using **Postman and JUnit**, validating complex API integrations. Conducted end-to-end testing for microservices, ensuring seamless data flow across distributed systems
