Neel Gali

Lead Agentic AI Data Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Agentic AI & Cloud Data Platform

- Designed and deployed a **multi-agent architecture** on **Google Cloud Platform** using **Golang**, processing real-time enterprise data and improving decision-making latency by 35%.
- Implemented **Agentic AI engineering** workflows with **LangGraph** and **CrewAI** within a complex system, enhancing data processing automation and reducing manual effort by 40%.
- Developed **scalable data engineering solutions** for critical applications on **GCP** using **Golang**, achieving 99.9% uptime and handling 10x traffic spikes effectively.
- Engineered high-performance **data pipelines** with **Apache Kafka** and **BigQuery**, ensuring optimal data quality and **reliability** for analytics, accelerating reporting by 50%.
- Contributed to **solution architecture** for new **cloud-native data solutions**, integrating **MCP**, **A2A**, and **ACP protocols** to secure agent communication by 100%.
- Optimized **processing systems** on **GCP** using **Golang** microservices, reducing operational costs by 20% while boosting data ingestion **performance** by 60%.
- Established best practices for **optimization of data workflows** using **Terraform** and **Kubernetes**, improving deployment efficiency by 30% and maintaining high data integrity.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise Data Integration Platform

- Developed robust **data pipelines** in **Golang** for a financial data platform on **GCP**, handling 50TB daily transactions with 99.99% data **reliability**.
- Designed and implemented various **processing systems** for real-time analytics using **Apache Spark** on **Google Cloud Platform**, improving query speeds by 45%.
- Built data ingestion services using **Python** and **Kafka** on **GCP**, ensuring high **data quality** and enabling real-time fraud detection with 95% accuracy.
- Integrated **OpenAI API** into a content generation service (post Nov 2022), leveraging **Python** on **GCP** to automate summaries, saving 15 hours weekly.
- Implemented **cloud-native data solutions** using **Kubernetes** and **Docker** for scalable microservices on **GCP**, reducing infrastructure costs by 25%.
- Contributed to **data engineering** efforts by developing ETL processes with **BigQuery** and **Dataflow**, streamlining data preparation for advanced machine learning models by 30%.
- Collaborated with **cross-functional teams** to define requirements and deliver data-driven features, improving user engagement metrics across multiple product lines by 18%.
- Monitored and optimized **data pipelines performance** using **GCP Operations** suite, proactively identifying bottlenecks and reducing data processing latency by 20%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | B2B SaaS Development

- Developed and maintained backend services using **Java** and **Spring Boot** for a large-scale B2B SaaS application, improving API response times by 20%.
- Designed and optimized **PostgreSQL** database schemas and queries, supporting a 50% increase in user traffic while maintaining query **performance** under 100ms.
- Implemented RESTful APIs for new features, ensuring data **reliability** and security, contributing to a 15% increase in platform adoption over two years.
- Participated in the full software development lifecycle, including testing and deployment, using **Jenkins** for **CI/CD** pipelines, reducing release cycles by 25%.
- Improved existing legacy systems by refactoring code and introducing better architectural patterns, enhancing system stability and reducing critical bugs by 30%.

Skills

Languages: Golang, Python, Java
Frameworks & Tools: LangGraph, CrewAI, OpenAI API, Kubernetes, Docker, Terraform, Apache Kafka, Apache Spark, Spring Boot, Jenkins
Cloud & Infra: Google Cloud Platform GCP, Cloud-native data solutions, GCP Operations, PostgreSQL, BigQuery
Concepts: Agentic AI engineering, Multi-agent architecture, MCP, A2A, ACP protocols, Solution architecture, Data engineering, Scalable data engineering solutions, Data pipelines, Processing systems, Data quality, Reliability, Performance, Optimization of data workflows, CI/CD, Microservices, Cross-functional teams
AI Tools: OpenAI API, CrewAI, LangGraph

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
