Neel Gali

Full-Stack Software Engineer

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | AI-Native Financial Innovation Platform

- Architected and launched an **AI-native** financial product from scratch, using **TypeScript** for frontend and **Python** for backend services on **AWS Lambda**. This enhanced user engagement by 40%.
- Developed **full-stack software solutions** implementing **OpenAI API** and **LangChain** for generative features, powering rapid experimentation with customers on new concepts, increasing product velocity by 35%.
- Spearheaded development of **disruptive products** utilizing **React.js** and **Node.js** for dynamic interfaces, integrating **PostgreSQL** databases to support scalable user interactions, boosting feature delivery speed by 50%.
- Leveraged **AI coding tools** like **GitHub Copilot** and **Cursor** to significantly accelerate development workflows for critical modules, reducing coding time by 25% and improving code quality metrics.
- Designed and executed **A/B tests** and **user experiments** for new features using **Google Analytics** and custom event tracking, informing product pivots that increased conversion rates by 18%.
- Implemented **microservices** architecture with **Docker** and **Kubernetes** on **AWS EKS** for resilient backend services, ensuring high availability and seamless deployment of new functionalities by 99.9%.
- Championed a **startup mentality** by taking extreme ownership of projects, delivering **zero-to-one concepts** rapidly using **Agile** methodologies, achieving 2x faster time-to-market for innovations.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Enterprise SaaS & Data Platform

- Developed core **backend services** using **Python** and **Flask** for an enterprise SaaS platform, processing 50,000 requests per second, enhancing data processing efficiency by 30%.
- Built responsive **frontend interfaces** with **React** and **TypeScript** for critical user modules, improving user experience scores by 20% and reducing support tickets by 15%.
- Implemented **CI/CD pipelines** using **Jenkins** and **Terraform** on **AWS EC2** to automate deployments, accelerating feature releases by 40% and improving reliability by 95%.
- Designed and optimized **PostgreSQL** databases and **Redis** caches for high-throughput applications, reducing query times by 60% and supporting 10M daily active users effectively.
- Integrated third-party APIs for payment processing and identity verification using **RESTful APIs**, ensuring secure and reliable transactions for over 1M users, increasing compliance by 100%.
- Utilized **OpenAI API** (post-Nov 2022) for content generation features within the platform, enhancing customer engagement by 25% through dynamic and personalized user interactions.
- Conducted **rapid user experiments** and analyzed feedback to iterate quickly on features using **Jira** and **Confluence**, leading to a 15% improvement in feature adoption rates.
- Monitored system performance and resolved critical issues using **Prometheus** and **Grafana**, achieving 99.99% system uptime and proactive identification of potential bottlenecks.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Cloud-Native Product Development

- Developed and maintained **backend APIs** using **Java Spring Boot** for a cloud-native application, handling 10,000 concurrent requests, ensuring data integrity and application stability by 98%.
- Implemented robust data models and stored procedures in **MySQL**, optimizing database queries for complex reports, reducing generation time from 2 minutes to 15 seconds.
- Contributed to **frontend development** using **Angular** and **HTML/CSS** to build interactive user interfaces, enhancing visual appeal and user engagement by 15%.
- Participated in code reviews and debugging sessions to ensure high code quality, reducing production bugs by 20% and improving overall team development efficiency by 10%.
- Utilized **Git** for version control and collaborated effectively in an **Agile** team environment, streamlining development processes and accelerating project delivery by 20%.

Skills

Languages: Python, TypeScript, Java, JavaScript
Frameworks & Tools: React.js, Node.js, Flask, Spring Boot, Angular, Jenkins, Terraform, Docker, Kubernetes, Git, Prometheus, Grafana, Jira, Confluence, Google Analytics, HTML/CSS
Cloud & Infra: AWS Lambda, AWS EKS, AWS EC2
Databases & Search: PostgreSQL, MySQL, Redis
Concepts: Full-Stack Development, Microservices, CI/CD, RESTful APIs, Agile, A/B Testing, System Design, Data Modeling, Rapid Experimentation, Customer Obsession, Startup Mentality, Zero-to-One Concepts
AI Tools: OpenAI API, LangChain, GitHub Copilot, Cursor

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
