Neel Gali

Data Engineer – AI/BI

neelgali7@gmail.com | +1(475)-291-1455 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

Epik Solutions | Enterprise AI/BI & Data Governance Platform

- Architected and scaled **Databricks AI/BI** solutions end-to-end, integrating **governed semantic models** with **SQL** and optimized query layers, boosting reporting speed by 35%.
- Developed and operationalized **Databricks Genie experiences** by curating datasets, metadata, and prompts for **natural language analytics**, increasing self-service data access by 40%.
- Designed and delivered complex **Databricks dashboards** and visual products, translating data into clear, actionable insights for stakeholders, improving decision-making accuracy by 25%.
- Implemented and optimized end-to-end **ELT pipelines** on **Databricks** using **Medallion Architecture** principles, reducing data processing latency by 50% for critical systems.
- Built robust and scalable **ETL pipelines** using **Apache Spark** and **Delta Lake**, transforming raw data into trusted curated layers for enhanced analytics, improving data quality by 30%.
- Operationalized **Databricks Workflows** for orchestrating complex dependencies and automating data pipelines, achieving a 99.9% uptime for daily data refreshes.
- Applied advanced **schema evolution** and **data versioning** techniques to support agile data development, ensuring backward compatibility across 10+ major data releases.
- Enforced stringent **data security** best practices including **row-level security** and **fine-grained access control** via **Unity Catalog**, achieving 100% compliance.

Software Engineer *Jul 2022 – Jun 2025*

Samay Systems LLC | Cloud Data Integration & Analytics

- Developed high-volume **ELT pipelines** using **Python** and **Apache Spark** on **Databricks**, processing 100TB+ monthly data into **Medallion Architecture** layers, reducing processing time 30%.
- Integrated data from enterprise systems like **PeopleSoft** and **Salesforce** using **APIs** and **JDBC** connectors, establishing robust ingestion for critical business data.
- Designed and implemented standardized data ingestion processes with automated error handling and retries, reducing data load failures by 75% across 20+ sources.
- Built **Delta Lake** based data marts and warehousing solutions on **Azure Data Lake Storage (ADLS)**, optimizing storage for performance and cost-efficiency by 20%.
- Developed comprehensive **data quality checks**, validation rules, and anomaly detection mechanisms, ensuring data integrity across all data layers, reducing reporting errors by 40%.
- Integrated **monitoring and observability tools** like **Grafana** to track **ETL** performance, latency, and failures, improving pipeline reliability to 99.95%.
- Implemented **Unity Catalog** for centralized metadata management, data lineage, and governance policy enforcement, enhancing data discoverability and trust by 50%.
- Supported **MLOps lifecycle workflows** using **MLflow** for experiment tracking and model registry, streamlining model deployment within **Databricks** by 30%.

Software Engineer *Jul 2020 – Aug 2022*

Zemoso Technologies | Backend Systems & Data Services

- Developed robust **Python** backend services for data processing and RESTful **APIs**, handling 500K daily requests from various client applications with 99.9% uptime.
- Designed and maintained scalable data ingestion pipelines that processed diverse structured and semi-structured data formats, improving data availability for analytics by 20%.
- Optimized database queries and schemas for a critical transactional system, significantly improving data retrieval performance by 35% for high-traffic applications.
- Implemented automated data validation routines and error reporting mechanisms within ETL processes, reducing manual data discrepancy identification efforts by 60%.
- Contributed to a **CI/CD** pipeline development, automating testing and deployment processes for backend services, reducing release cycle time by 40%.

Skills

Languages: Python, SQL
Frameworks & Tools: Databricks, Apache Spark, Databricks Workflows, JDBC, Grafana, MLflow, APIs, PeopleSoft, Salesforce, Databricks AI/BI, Databricks Genie, Semantic Models, Natural Language Analytics
Cloud & Infra: Azure, Azure Data Lake Storage (ADLS), Unity Catalog, Delta Lake
Concepts: Medallion Architecture, ETL/ELT, Data Quality, Monitoring, Observability, Data Governance, Schema Evolution, Data Versioning, MLOps, Row-level Security, Fine-grained Access Control, Feature Stores, REST APIs

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
