Neel Gali

Software Engineer – Developer Platform & Infrastructure
neelgali7@gmail.com | +1 (475) 291-1455 | Remote (US)

Summary

Software Engineer with 3+ years of experience building **internal developer platforms, tooling, and cloud-native services** that improve developer productivity, reliability, and onboarding. Strong background in **TypeScript, Python, AWS, infrastructure-as-code, and platform engineering**, with hands-on experience supporting internal users, writing operational documentation, and operating systems in production. Comfortable working in **remote, async teams** and owning systems end-to-end, including on-call responsibilities.

Technical Skills

Languages: TypeScript, Python, Go (working knowledge), Bash
Platform & DX: Internal developer portals, CLI tooling, service catalogs, software taxonomy
Cloud & Infra: AWS, Terraform, Kubernetes (working knowledge), Docker
Backend & APIs: REST APIs, platform services, authentication, service discovery
Frontend: React, internal dashboards, developer-facing UIs
Databases: Relational databases, schema design, migrations
Observability: Logging, metrics, tracing, on-call operations
Dev Workflow: GitHub, Jira, CI/CD, async collaboration
AI-Assisted Dev: ChatGPT, Copilot for code generation and debugging

---

Professional Experience

Epik Solutions
Senior Software Engineer – Platform & Developer Experience
July 2025 – Present

- Built **internal backend services and developer-facing APIs** to standardize how teams provision, test, and deploy services, reducing onboarding friction for new engineers.
- Developed **TypeScript and Python tooling** to automate local development setup and environment validation, improving developer productivity and consistency across teams.
- Designed and implemented **platform interfaces and internal dashboards** to surface service metadata, ownership, and health, supporting better software taxonomy and discoverability.
- Wrote **runbooks, internal documentation, and onboarding guides** to help engineers self-serve common platform workflows.
- Collaborated through **peer reviews, planning sessions, and async discussions** using GitHub and Jira in a fully remote environment.
- Participated in **on-call rotation**, troubleshooting production issues, performing root-cause analysis, and improving system reliability through follow-up fixes and automation.

Samay Systems LLC
Software Engineer – Platform Tooling & Cloud Infrastructure
February 2025 – June 2025

- Developed **cloud-native platform services** running on AWS to support internal engineering workflows and shared infrastructure capabilities.

- Implemented **Terraform-based infrastructure-as-code** to provision and manage cloud resources consistently across environments.
- Built and maintained **internal APIs and CLI utilities** used by engineers to interact with platform services and environments.
- Improved system observability by adding **structured logging and metrics**, enabling faster incident detection and resolution.
- Partnered with platform and application teams to iterate on developer tooling based on real user feedback.

Arvam Tech
Software Engineer – Full-Stack & Internal Tooling
July 2023 – January 2025

- Built **internal web applications and backend services** to support engineering workflows and operational tooling.
- Developed **React-based internal dashboards** to manage configuration, service state, and operational metadata.
- Implemented backend APIs with a focus on **clarity, stability, and developer ergonomics** for internal consumers.
- Supported production systems by diagnosing failures, improving deployment reliability, and documenting operational procedures.
- Worked closely with cross-functional teams to align tooling with real developer needs.

RHYM Tech
Software Engineer – Platform Foundations
August 2022 – May 2023

- Built backend services supporting **internal workflows and shared platform capabilities**.
- Assisted in maintaining development environments and deployment pipelines.
- Contributed to debugging production issues and improving long-term system stability.

ZeMoSo Technologies
Associate Software Engineer
July 2021 – August 2022

- Developed backend and frontend components for **internal and customer-facing tools**.
- Implemented REST APIs and UI features aligned with evolving platform requirements.
- Gained hands-on experience with **end-to-end software delivery, testing, and production support**.

Education

Master of Science in Computer Science
Oklahoma State University

Bachelor of Technology in Computer Science
JNTU Hyderabad
