Neel Gali

Data Scientist – Enterprise & Industry Analytics
neelgali7@gmail.com | +1 (475)-291-1455 | United States

Summary

Data Scientist with 5+ years of experience applying **machine learning, statistical analysis, and digital analytics** to enterprise and industry-focused use cases. Strong background in **feature engineering, model development, and model operationalization** on cloud data platforms. Proven ability to translate business and industry requirements into governed, scalable ML solutions while collaborating closely with data engineers, architects, and business stakeholders.

Technical Skills

Languages & Libraries: Python, SQL, Pandas, NumPy, scikit-learn, TensorFlow, PyTorch
Machine Learning: supervised & unsupervised learning, classification, regression, clustering, model validation
Analytics & Statistics: exploratory data analysis, hypothesis testing, feature engineering, statistical modeling
Data Platforms: data lakes, medallion architecture (bronze/silver/gold), ETL/ELT pipelines
Cloud & ML Platforms: Azure ML, AWS (S3, SageMaker), OCI (data & analytics services)
Visualization & Reporting: dashboards, analytical reports, stakeholder-ready insights
Governance & Compliance: data quality checks, lineage, access controls, regulated data handling
Collaboration: agile teams, cross-functional delivery, business communication

---

Professional Experience

Epik Solutions (*Jul 2025 – Present)*

Data Scientist (Enterprise Analytics & ML Solutions)

- Developed **machine learning models** to analyze multi-source enterprise datasets, enabling actionable insights for operational and industry-specific decision-making.
- Performed **feature engineering and data wrangling** across structured and semi-structured data to improve model signal quality and downstream performance.
- Conducted **exploratory data analysis and statistical testing** to validate hypotheses and inform model selection.
- Collaborated with **data engineers and architects** to leverage cloud data platforms and medallion architectures for scalable analytics.
- Built **stakeholder-ready visualizations and reports** translating model outputs into clear business recommendations.
- Operationalized models within enterprise pipelines, ensuring **reproducibility, monitoring, and maintainability**.
- Ensured analytics workflows adhered to **data governance, security, and compliance requirements**.

Samay Systems LLC (*Feb 2025 – Jun 2025)*

Data Scientist (Applied ML & Industry Analytics)

- Designed and trained **supervised and unsupervised ML models** addressing compliance and industry-specific analytic use cases.
- Engineered features from large-scale datasets using cloud-native data services to support robust model performance.
- Partnered with product and domain experts to translate **business questions into analytic approaches** aligned with enterprise needs.
- Validated models using appropriate metrics and cross-validation techniques to ensure reliability and interpretability.
- Communicated findings to non-technical stakeholders through **clear narratives, dashboards, and presentations**.
- Supported model deployment and iteration as data and business requirements evolved.

Arvam Tech (*Jul 2023 – Jan 2025)*

Data Scientist (Analytics & Predictive Modeling)

- Applied **advanced analytics and ML techniques** to operational and inventory datasets to identify trends and optimization opportunities.
- Built **feature-rich datasets** by integrating multiple data sources through ETL pipelines in a cloud environment.
- Conducted **statistical analysis and exploratory modeling** to support forecasting and scenario analysis.
- Collaborated with engineering teams to ensure analytical models aligned with platform architecture and performance constraints.
- Delivered insights through **visual dashboards and analytical reports** for business stakeholders.

RHYM Tech (*Aug 2022 – May 2023)*

Data Scientist (Analytics Foundations)

- Developed analytical models using Python and SQL to analyze high-volume telemetry and event data.
- Performed **data cleaning, transformation, and feature extraction** to support downstream ML tasks.
- Assisted in validating models and monitoring data quality to maintain analytical accuracy.
- Worked within agile, cross-functional teams to iterate on analytics solutions.

ZeMoSo Technologies (*Jul 2021 – Aug 2022)*

Associate Data Scientist

- Supported data science initiatives through **data preparation, exploratory analysis, and basic modeling**.
- Assisted in building analytical pipelines and reports aligned with business requirements.
- Gained hands-on experience with **enterprise data practices, governance, and cloud environments**.

Education

Master's in Computer Science — Oklahoma State University
Bachelor's in Computer Science — JNTU Hyderabad
