Neel Gali

Senior Software Engineer
neelgali7@gmail.com | +1(475)-291-1455

Summary

- Senior Software Engineer with 5+ years of experience building product-driven, customer-facing systems that power personalization, experimentation, and growth.
- Strong background in full-stack development, microservices, data-informed product iteration, and recommendation-adjacent systems, with proven impact on engagement, conversion, and customer lifetime value.
- Experienced working cross-functionally with Product, Design, Marketing, and Data Science to deliver measurable business outcomes.

Skills

Languages & Frameworks: Ruby on Rails, Kotlin, Java, python, React, TypeScript
Backend: Rails, spring boot, Express.js, Microservices architecture, REST APIs, pricing & offer orchestration
Frontend: React, Angular, Logged-in dashboards, personalized UI experiences,
Growth Engineering: Experimentation (A/B testing), personalization, optimization funnels
Data & Analytics: MySQL, MongoDB, Oracle, Cassandra, pyspark, Event instrumentation, behavioral tracking, feature flags
Infrastructure: Cloud-native services (AWS, Azure), CI/CD, Git, monitoring & alerting
Collaboration: Product-led development, cross-functional delivery, iteration cycles

Professional Experience

Epik Solutions *July 2025 – Present*
Senior Software Engineer (Growth Platforms & Personalization)

- Designed and implemented personalized offer delivery services that surfaced context-aware product recommendations to logged-in users, increasing engagement and repeat interactions.
- Built microservices-based APIs to orchestrate pricing logic, eligibility rules, and offer sequencing, enabling rapid experimentation without frontend rewrites.
- Enhanced the user dashboard experience by integrating personalized data signals and dynamic content, improving clarity and conversion for cross-sell opportunities.
- Partnered closely with Product Managers, Designers, and Marketing to translate growth hypotheses into shippable features backed by measurable KPIs.
- Instrumented event-level analytics and experimentation hooks to support A/B testing, cohort analysis, and iterative optimization.
- Incrementally improved system quality through disciplined pull requests, code reviews, and performance tuning.

Samay Systems LLC *Feb 2025 – Jun 2025*
Senior Software Engineer (Product & Experimentation Systems)

- Built feature-flagged microservices supporting experimentation and gradual rollout of personalized product experiences.
- Implemented backend logic for targeted recommendations and eligibility filtering, allowing business teams to adjust strategies without redeployments.
- Developed APIs that aggregated behavioral signals and account data to drive personalized content and offers.

- Collaborated with Research and Analytics teams to ensure data collection supported experimentation and conversion analysis.
- Maintained high engineering standards through testing, documentation, and structured technical reviews.

Arvam Tech *Jul 2023 – Jan 2025*
Software Engineer (Full-Stack Product Development)

- Developed customer-facing dashboards that presented actionable insights and recommendations tailored to user context.
- Built and maintained backend services supporting product workflows, user state, and real-time updates.
- Implemented event tracking and instrumentation to measure feature adoption, engagement, and funnel performance.
- Worked cross-functionally with product and design to refine UX flows based on usage data and feedback.
- Supported continuous delivery through CI/CD pipelines and proactive production monitoring.

RHYM Tech *Aug 2022 – May 2023*
Software Engineer (Product Platforms)

- Built backend services supporting user engagement workflows and internal tooling.
- Implemented data collection mechanisms to support analytics and future personalization efforts.
- Assisted in debugging production issues and improving system reliability.

ZeMoSo Technologies *Jul 2021 – Aug 2022*
Associate Software Engineer

- Developed backend and frontend components for web-based products.
- Implemented REST APIs and UI features aligned with evolving product requirements.
- Gained hands-on experience in full-stack development and collaborative delivery.

Projects

Personalized Offer Delivery Platform
Built services to dynamically surface targeted offers based on user behavior, eligibility, and pricing logic. Enabled rapid experimentation and iteration, directly impacting engagement and customer lifetime value.
Experimentation-Driven Dashboard Enhancements
Instrumented dashboards with event tracking and A/B testing hooks to optimize conversion and retention. Partnered with product and marketing teams to iterate based on data-driven insights.

Education

Master's in Computer Science, Oklahoma State University, Stillwater, OK *May 2024*
Bachelor's in Computer Science, JNTU Hyderabad, India *Jun 2021*
