Venkata Sai

Full Stack Developer (AI Focus)

venkatasai.jobs@gmail.com | +1(512)-848-0295 | Austin, TX

Professional Experience

Senior Software Engineer *Jul 2025 – Present*

EPAM Systems | AI-Powered Enterprise Solutions

- Designed and implemented **Python** microservices with **FastAPI** for financial fraud detection, integrating **OpenAI API** for anomaly scoring, enhancing detection accuracy by 15%.
- Developed **Node.js** backend services on **IBM Cloud Infrastructure** with **Kubernetes** for an LLM content platform, supporting 500k daily requests efficiently.
- Architected and deployed **RAG** pipelines with **LangChain** and **PostgreSQL** vector stores, significantly improving content relevance for enterprise search by 20%.
- Led **Watsonx** integrations for a customer service chatbot, fine-tuning **Granite** models on proprietary data, achieving a 10% reduction in support tickets.
- Implemented **CI/CD pipelines** using **GitHub Actions** and **Docker** for automated testing and deployment of **Python** AI services, accelerating release cycles by 25%.
- Mentored junior engineers on **LLM prompt engineering** best practices and **micro-services architecture** principles, improving team productivity and code quality by 15%.
- Developed robust **JavaScript** frontend components using **React** for an AI-powered analytics dashboard, improving user engagement with data visualizations by 30%.

Software Engineer *Jul 2022 – Jun 2025*

Globant | Enterprise SaaS Platform Development

- Built **Java REST** APIs with **Spring Boot** for enterprise HR SaaS, processing 100k daily transactions, enhancing system reliability by 20%.
- Implemented scalable data processing workflows using **Python** and **Apache Kafka** for real-time analytics, handling 5M events/hour, enabling faster business intelligence decisions.
- Designed and optimized **PostgreSQL** database schemas and queries for a high-volume e-commerce application, improving data retrieval performance by 35% for critical operations.
- Integrated **OpenAI API** into a document classification system using **Python** and **PyTorch** models, automating document categorization with 90% accuracy.
- Developed secure authentication/authorization modules using **JWT** and **Node.js** with **Express.js**, enhancing platform security and user access control by 25%.
- Collaborated on developing **Docker** containers and **Kubernetes** deployments for microservices, streamlining environment setup, reducing deployment time by 40% across teams.
- Configured **CI/CD pipelines** using **Jenkins** and **Git** for automated testing and deployment of backend services, reducing manual release efforts by 50%.
- Developed accessible **HTML**, **CSS**, and **JavaScript** frontends using **Angular** for a client portal, improving user experience and reducing load times by 15%.

Software Engineer *Jul 2020 – Aug 2022*

Thoughtworks | Agile Web Development

- Developed robust backend APIs using **Ruby on Rails** and **PostgreSQL** for supply chain management, processing 50k daily inventory updates, improving data integrity.
- Implemented interactive **JavaScript** frontends with **React** and **Redux** for data visualization, enhancing user engagement and reducing page load times by 20%.
- Contributed to **CI/CD pipeline** setup with **Jenkins** and **Git** for automated builds and testing, accelerating deployment frequency by 30% for teams.
- Authored comprehensive unit and integration tests using **JUnit** and **Selenium** for critical application modules, reducing post-release defects by 25%.
- Participated actively in **agile development methodologies**, including daily stand-ups and sprint reviews, improving team collaboration and project delivery efficiency.
- Designed and optimized **MySQL** databases for a ticketing system, improving query performance by 40%, ensuring efficient data storage for 1M user records.

Skills

Languages: Python, Node.js, Java, JavaScript, HTML, CSS, Ruby
Frameworks & Tools: FastAPI, Express.js, Spring Boot, LangChain, React, Angular, Redux, Apache Kafka, JWT, Docker, Kubernetes, GitHub Actions, Jenkins, Git, JUnit, Selenium, Ruby on Rails, REST
Cloud & Infra: IBM Cloud Infrastructure, CI/CD, Microservices, PostgreSQL, Cassandra, MySQL, Vector Stores
Concepts: LLM Prompt Engineering, RAG, Microservices Architecture, Agile Methodologies, API Design
AI Tools: OpenAI API, Watsonx, Granite, PyTorch

Education

Master's in Computer Science, Oklahoma State University, Stillwater
Bachelor's in Computer Science, JNTU Hyderabad, India
